Thread: [Slot Machine winnings \(\\$1800\)](#)

Well I forgot to take a picture of the actual slot machine.. I go to the casino every 3-4 days with my dad since we're "High Rollers"(Top level rewards program they have for Poker tournament winners and frequent high stakes gamblers) there and get \$75-\$125 in free play on every visit.

Anyways we decided to go out for a midnight buffet dinner at the casino since its free for us to eat there and we were starving. After eating we headed to the slots since the poker room was closed for maintenance and put in \$100 into the \$5 slot machine.. After 10 spins we were up \$1250. We sat there for 2 hours playing slots and eventually cashed out at 1800.

I DO NOT RECOMMEND ANYONE TO PLAY SLOTS. They are all luck based and in the long run you will lose money. We just got lucky.

You never know, you might get luck! I always tell everyone to learn to play poker. Since you're not playing the house but other players instead.

Nice you did get pretty damn lucky. The machines are purposely set to rarely give out big prizes as you would already know. That's why you play poker, a more skillful game haha.

How do you become "High Rollers"?

Just curious.

3 ways from what I know.

Gamble \$500 on every visit (this requires 2 visits a week) for a couple of weeks.

Win a poker tournament. Some casinos give you vip status after you win a tournament.

or you have to spend a total of 200 hours at any casino. So its something you earn over the years.
Casinos have a shared database of gamblers. They keep track of everyone.
