---Punisher-Rat v1.2---

I found this RAT and decide to give it a little test , and i was really surprised with it and all this good and working features , and once again we see that free rat could be really efficient ...

I will explain you how to build the server , and how to use this RAT and this functions works :)

New features of the 1.2 fix version :

- Code - Create Server Has been Updated+++
- Registry Manager Added+++
- Remote Shell Added+++
- Remote Cam Has been Updated+++
- Remote Keylogger Updated +++
- VBS Script Added+++
- Uninstall Server Fixed+++
- Rename Server Has been added+++

Functions and features :

- file manager
- registry manager
- process manager
- remote desktop
- remote webcam
- keylogger
- passwords stealer
- command prompt

Server Options :

- restart
- remove
- rename
- update

Run file :

- from disk
- from link

Script :

- Vbs

Computer :

- log off
- restart
- shutdown

- Open URL
- DDoS option (basic)
- fun functions
- text to speech

The client have also his own noip updater :

Let's see now how to build a server :

Like any other RAT , go to the server edition button and enter , your dns (ex: hackforums.no-ip.org) , the port you choose to use , and choose any password you want :

Now go to the "install" option , you will have to choose a name for your server.exe , you will have to choose where it will be installed and random a start up key (only click on random a few times) :

Now the "extra" button will show you others options like antis and disable functions (keep in mind that the more you choose options , the more your server will be detected):

Now there is the last part of the server edition , just choose an icon (a great pack of HQ Icon is provided with the RAT) , and hit "build" :

Now your server if fully setted up , let's see what will happen when a victim will run it

Punisher RAT will advretise you of any new connection with a notification windows like that :
[img]http://im31.gulfup.com/UpXZ5.png[/img]

And you will see your first slave connected in your Client like the picture :

You can have fun with your slaves :) Just take a look on the marketplace to get a fully compatible FUD Crypter

Antivirus Scans :

All credits go to the developer of this RAT , Rahoz who makes a great job with this software

Best regards

?

Milliønaire - December 19, 2013, 3:43 pm

Hmm, anyone know anything about this?

Sigma - December 19, 2013, 4:30 pm

How did you randomly find this RAT OP?

iMalware - December 19, 2013, 5:08 pm

Noo. Not another cp of this arabic shit ass code. He skidded the code from this source

I knew I had seen that "fun" Icon before. I had a feeling it was from that RAT. Everybody seems to

attempt to skid that RAT.

iMalware - December 21, 2013, 3:03 am

Yeah. It's the worst source you can skid.

br0ck - December 21, 2013, 3:09 am

<http://www.dev-point.com/vb/t313948.html>

It's from that Jordan RAT shit.

It's from that Jordan RAT shit.

after all it is just a share and when i see how much people are still using shitcomet with his tons of bugs i thought that offer some alternatives , even if it is not a high quality rat as netwire , can be a good thing

fraps - December 21, 2013, 3:14 am

you should sell this, it looks better than blackshades.

?

He just leach it from dev-point forum he didnt code it.

DarK-D3v!L - December 21, 2013, 3:37 am

(Dec 21, 2013 04:24 AM)KAN3= Wrote: [\[CITE\]](#) He just leach it from dev-point forum he didnt code it. i leeched absolutely nothing sir , i found it on another forum as i already said , and then i type the RAT name in google , and i found a blogspot with that rat on

i don't read , speak or understand arabic langage so i don't have to do with devpoint , i just shared it and leech absolutely nothing

then i gave credits in my thread , so i think i will never share anything here if i always recive comments like that

i am not the coder of that , so i will never seel something is not mine lol

best regards

no problem sir , of course i take no offense , you are always a Very HQ member and of course i unerstand your opinion :)

I know that the source of this rat have been seen so many times , but i think clean and working RAT are always usefull to the community

as i said so many times , i am not a programmer at all , i just like to share working and clean softwares and i like to help new members too

best regards to all
