Thread: [\[Tutorial\] Slaves via Omegle/Chat rooms](#)

Prof. Farnsworth - December 20, 2013, 11:44 am

I posted this some time ago, going to post it again for new users.
Enjoy!

Things you need:

- RAT
- Some pics of a girl
- Spoofers
- Binder
- Skype account or messenger something like that. But I recommend Skype.

Optional:

- Crypter for the RAT

Now lets get started.

- 1- Crypt your RAT if you have a crypter. If not hope that they don't have a antivirus.
- 2- Bind the RAT to the picture and change the icon to make it look as the picture.
- 3- Get on Omegle or ADULT chat room.
- 4 Omegle - On Omegle pretend that you are a horny girl stuff like that, get them on skype send them some pics of yourself (whore) and make sure you send the RAT, usually I zip the pics and send them as a ZIP file.
- 4 ChatRooms - Say something like : "Bored and horny any1 up to skype? add me [Skype name]" and then wait for the friend requests, I got about 10 friend requests in less than a minute. And then again you send the pics and the RAT.
- 5- Enjoy!

To improve results: Send them a legit picture first (non-nude), then wait for them to ask for a nude. Make sure you sound reluctant, and only send it after some half-hearted verbal doubts about sending one.

Sending the legit picture will make them perceive you as more legit and make them hungry for more. The reluctance to send the second picture will make them want it even more, so they will likely open it faster (and be less likely to notice the different extension name).

Prof. Farnsworth - December 20, 2013, 3:12 pm

True that, but usually they are already horny and "hungry" when they read the word "Nude". And about the extension, use a spoofer.

Guys this method takes a lot of time its better to spread on torrent rather then wasting hours on Omegle with preverts

Prof. Farnsworth - December 20, 2013, 3:25 pm

You can use a omegle spammer and skype spammer.
Something like that.

Fizure - December 20, 2013, 5:39 pm

how do u get You can use a omegle spammer and skype spammeR or where? (Dec 20, 2013 04:25 PM)arthurik13 Wrote: [\[CITE\]](#) You can use a omegle spammer and skype spammer.

There are some programs out there that type something on omegle and press next automatically, and they do that over and over.

And on skype programs that automatically respond on skype, with a link for example. ?

No problem man.

It just came in my mind that you could e-whore and infect xD
