Thread: [\[TUT\] LAN SCHOOL: HOW TO BECOME TEACHER IN LAN SCHOOL](#)

ars2012 - December 20, 2013, 3:23 pm

Don't you want to troll class mates and fuck around with there computers? ? Or also send messages to certain students to troll them? If your school uses Lan School
[img]http://www.nhste.org/Resources/Pictures/lslogo.jpg[/img]
Then your in luck :)

First things first download these files:

Lanschool setup/uninstall: <http://adf.ly/b0GpA>

Virus scan : <http://adf.ly/b0HBL>

Lanschool teacher (this runs the teacher console once you install it) <http://adf.ly/b0HRm>

Virus scan: <http://adf.ly/b0He0>

Once you downloaded these, put them on a USB.

Then you should have this in your USB.

Secondly run the Setup file, and you should see the lan school setup prompt. Click next, accept the terms.

When this prompts be sure to select Uninstall.

Then run setup.exe again, this time instead of clocking un-install select Install as Teacher.

Once the install as teacher has been completed, you can then run the Teacher program that lies in your USB.

Congratz now all you need is some popcorn to watch some high class entertainment!

Somethings to note, once you Uninstall the student, the teacher can no longer invade your privacy and watch what you do, and lastly this should run from a USB stick, so there is no need to transfer these files into a school computer!

Have fun with this one!

What version this works with?

My school uses 7.5.xxx

Neonx7FuZion714K - December 20, 2013, 4:17 pm

Yes finally my school uses this all around I'll probably get kicked off the computers but its worth it

eckoowns - December 20, 2013, 4:55 pm

thank you, after reading this i felt this taught me a lot

No problem man! This is just for fun/educational purposes. Try not to get caught though.

Any more Vouches? I would like to see more comments on this :) Lol.

Stone Island - December 28, 2013, 7:23 am

Will try this when holiday is over, thanks. Good tut bro ?

anoperson - March 30, 2014, 1:16 am

I assume that this exploit no longer works. Any luck with version 8?
(sorry for digging up old thread)

Stack Overflow - April 1, 2014, 9:11 pm

Never. Fucking. Mind. Nope. Nope. Nope.

Banana Lord - April 1, 2014, 9:51 pm

LOL this would have been awesome if my school used it xD

iDuL - April 2, 2014, 12:36 am

Hopefully this still works for people, thanks for also posting a virus scan.
