Thread: [\[VB.NET\]Show system time](#)

codepoet - April 30, 2010, 9:37 am

Show system time into StatusStrip (lable)

```
Code Private Sub TimerRelogio_Tick(ByVal sender As System.Object, ByVal e As
System.EventArgs) Handles TimerRelogio.Tick
    Me.lblTime.Text = Date.Now
End Sub
```

```
Private Sub frmMDIParent_Load(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles MyBase.Load
    TimerRelogio.Start()
End Sub
```

Thank you very much for this, I was looking for it.

Voluxe - April 30, 2010, 9:40 am

Or:

```
Quote:Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles MyBase.Load
    Timer1.Start()
End Sub
```

```
Private Sub Timer1_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Timer1.Tick
    Label1.text = TimeOfDay
End Sub
```

(Apr 30, 2010 09:40 AM)Alex VS Alex Wrote: [\[CITE\]](#) Or:Code Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles MyBase.Load
Timer1.Start()
End Sub

```
Private Sub Timer1_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles
Timer1.Tick
    Label1.text = TimeOfDay
End Sub
```

Thanks, this is cleaner code.

codepoet - April 30, 2010, 9:45 am

sorry my code was not noob friendly.....lol

It's not that, not at all. It's just your code was for VB6.

iKorkSkalle - April 30, 2010, 10:09 am

Very basic but good for newbies.

If you are using a status strip, use this:

Double click the top of your form and add this:

Code timer1.start

Add a timer, double click it and add this code:

Code ToolStripStatusLabel1.Text = TimeOfDay

Well give me another way I can show the time of day? When there is limited ways of doing things, then sometimes you will have to use the same code. And I didn't copy it either. I typed it out. Not a hard bit of code.

Mark Webber's B1tch - April 30, 2010, 12:30 pm

Very basic, but still nice.

Thanks for sharing mate.

?

codepoet - April 30, 2010, 1:49 pm

no problem... i'm glad you like it
