Thread: [\[Photoshop\] Falling objects in animated .gif](#)

Dr1ps - December 21, 2013, 10:30 am

Made a small guide due to a request on how to make animated falling snow in a picture.

Well explained and very simple.

Good tutorial!

Wow, where do you live? In a cave?

Just joking. Thanks for the tut, OP.

I barely ever use photoshop :L And when I use it, it has never been to make gifs. I might be using it in the very near future now that I know I can make gifs in it though.

Or you can make even greater animations like this loading circle one. [\(CLICK\)](#)
