You could have gotten them a Nexus 7 or maybe even an iPad Mini w/ Retina

B?STILLE - December 22, 2013, 6:22 pm

Very nice of you to do that! I bet they will love it, especially because it came from you!

Dafoo - December 22, 2013, 9:14 pm

Ipad mini sucks,Nexus is better but nah! Not worth it imo!

The laptop would be easier for them :)

Thats a nice laptop you got them! I wish I could afford buying my parents that!

You did well it should be just enough for them to do the basics on the internet :D

I would recommend installing Mac OSX on it though since that is just an OS that is designed for

elder people and people who are technologically challenged which in my opinion is 90% of the population over the age of 45

Merry X-Mas :)

I really hope that one day I will be able to buy my mom something nice. I'm sure your parents will love it!

Why does iPad Mini suck? It's probably much better than a weak laptop for watching Youtube videos and browsing the web

Dafoo - December 23, 2013, 7:50 am

This laptop is much stronger than the mini!

Cpu,ram > mini +

Check it out

Obviously, but the iPad will still load pages and apps faster, and lag less.

You don't need good vision to see clearly on a 7 inch screen. Especially not when the pixel density is as good as it is on the two tablets I mentioned.
