Thread: [\[Social Media Website\] GameSpire 'The Next Generation of Social Media'](#)

Infinite' - December 23, 2013, 9:56 pm

Hello HackForums Users,

My Website <http://www.GameSpire.net>.
<http://www.GameSpire.net/hfproof.txt>

Description: This website is a social media website a lot like Facebook, but for gamers. Buying this will give you full ownership rights.

That's all the proof. There is not traffic, but there is full code + admin CP we are trying for 350\$.

Offer me prices. Note: May be below 350\$ but more than 100\$

Thanks

I doubt you get \$350 for this site, no members, no traffic...
anyway good luck

I am quite willing to go lower. Post Offers!

DarkSwag has a point, you hardly have any traffic going towards the site. I honestly don't think it's worth anything over \$100. But GLWS mate.

It's the coding and the graphics that give it's value. This is a great site and can be used, in many ways.

I Vouch for @GoAerox, Trusty user :)

p.s: The site looks amazing and unique ^^ with only a couple of social gaming networks out there (I think) so it's a pretty unique niche and with little work this site can grow heavily!

- Luna,

p.s.s Merry Christmas, and have a good new year everyone

Let me get this straight.

Your selling a modified version of [this](#) \$40 script, for \$350. Correct me if I'm wrong.

Getting this on registration:

Error

Invalid captcha

I am entering the correct captcha

That means nothing. You can reuse the script all you want. You'd have to sell the license which would take more than a simple transaction. You did say earlier that the coding and graphics is what attributes to the site being great. I looked and it seems like the normal script, and the graphics aren't even close to being worth \$350. Lastly and most importantly, your site has no traffic.
