I hate photoshop so much, raster images look like so much crap when you scale them.

I wish people would start using illustrator more.. :(

J4mie - December 24, 2013, 9:33 am

Are you using anti-aliasing on your text?
It looks choppy af.

Ne?ro? - January 4, 2014, 1:21 am

This was amazing, cheers. Loving the text.

Myte - January 4, 2014, 2:50 pm

Its nice and simple looking. There's not much more to say. The best Photoshop text styles are the simple ones. That's why people moved to c4d text.

'Cynical - January 4, 2014, 7:30 pm

Now if only I had photoshop.. :P Oh well, guess it's good to know anyways.

Penario - January 6, 2014, 3:09 pm

VirtualFrost - *January 29, 2014, 1:20 pm*

I think this tutorial is missing a few details in it, such as you never told us to put a stroke in when you did. If you follow this it doesn't come out anything like the ones you made.

Antalya - *January 30, 2014, 5:51 pm*

thanks you for this. I think very nice (:
