Thread: [How do i make my facebook bot comment? cant find the right ID on facebook !!! HELP](#)

Zeitgo - December 24, 2013, 7:25 am

So guys the "js_5" script is obviously not working so guys how the hell do i make the bot i am making just find the comment box the bot works this way

1. login to facebook
2. insert permalink - automove to permalink in webbrowser
3. select time between comments
4. comment a prewritten comment saved in a textbox to the permalink / facebook status
5. loop the timer until press stop or close program

i cant seem to find the ID of how to comment
like when logging in its easy as ("email") and ("pass")
but there comes in js in the facebook comment box
and i cant find the right ID of how i make the bot comment -_-

anyone help please

Code Public Class sjalfupp

Dim logintakki As Boolean

Private Sub WebBrowser1_DocumentCompleted(ByVal sender As System.Object, ByVal e As System.Windows.Forms.WebBrowserDocumentCompletedEventArgs)
End Sub

Private Sub sjalfupp_Load(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles MyBase.Load
WebBrowser1.Navigate("http://www.facebook.com/login.php")
ListBox1.Items.Add("18000")
logintakki = False
End Sub

Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
logintakki = True
Try
WebBrowser1.Document.GetElementById("email").SetAttribute("value", TextBox5.Text)
WebBrowser1.Document.GetElementById("pass").SetAttribute("value", TextBox6.Text)
WebBrowser1.Document.GetElementById("login").InvokeMember("click")
Catch ex As Exception
End Try
Label1.Text = ("Innskráður")

End Sub

Private Sub TextBox1_TextChanged(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles TextBox1.TextChanged
WebBrowser1.Navigate(TextBox1.Text)
End Sub

```
Private Sub Button2_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button2.Click
Do
Timer1.Enabled = True
Timer1.Start()
WebBrowser1.Navigate(TextBox1.Text)
WebBrowser1.Document.GetElementById("js_5").InnerText = (TextBox2.Text)
SendKeys.Send("{Enter}")
Loop
End Sub
```

```
Private Sub Button3_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button3.Click
Timer1.Enabled = False
Stop
End Sub
```

```
Private Sub Timer1_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Timer1.Tick
Timer1.Interval = ListBox1.SelectedItem
End Sub
```

```
Private Sub ComboBox1_SelectedIndexChanged(ByVal sender As System.Object, ByVal e As
System.EventArgs) Handles ListBox1.SelectedIndexChanged

End Sub
```

```
Private Sub Button4_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button4.Click
Close()
End Sub
```

End Class

cant you do something like

```
Code WebBrowser1.Document.GetElementById("u_0_1q").SetAttribute("value", (TextBox1.Text))
```

i think that way u can get something into the text box now to get it to actually post im not sure

maybe not sure though sorry if this isnt right

please can someone bring me an update

Sutton2k9 - January 20, 2014, 12:06 am

I've not looked into it but maybe far easier to use a web request
