Thread: [\[C#\]League of Legends Summoner Statistics](#)

morphine1337 - December 25, 2013, 2:01 pm

Description: Let's say that you are in champion select at in a ranked game, and the last pick says "PLS LET ME MID I AM GOOD I AM OP SMURF DIAMOND 1", of course your first thought is to search him on lolking. What this program does, is accesing lolking and retrieving you his statistics. Basically this helps you the trouble of going to lolking, typeing his name etc.

Features:you can see his level

you can see in what league he is

you can see how much wins/losses he has

you can see his league points

you can go on his profile on loking by clicking on a link

you can switch betwen regions

you can see his summoner icon

ubbelol for his function GetBetween.

I know it isn't much but all of my programs are made in order to help me or someone else even if it's a simple one

ANY TIPS, TRICKS, CRITICS ARE WELCOMED

TrackPro+ - December 25, 2013, 2:48 pm

Good job man, thanks for the source also. :}

Debroski - December 25, 2013, 3:45 pm

Dunno if it's still like this, but Lolking used to be AWFUL about uptimes, when I went to make this i used the kassad.in(?) website instead, its MUCH faster and much easier to parse information

Otherwise, nice release!

?rthur - December 26, 2013, 1:14 am

What about lolnexus? Imo it's way better, gives a full indication of your own team and of the enemy team.

But your program looks nice

As far as i know, on lolnexus you can only get information when the respective player is in a game. But i need to check him up in champion select when the game hasn't started.

There's so much more you could do:

That's what my tool looked like :P

When you didn't input names, it would hook to the game and pick the names from there.

What do you mean by "i would hook to the game and pick the names from there". Do you mean like taking them from the memory?

morphine1337 - December 27, 2013, 3:59 am

I can't seem to find the adressess myself. Can you help me a bit here?

Dennis - December 27, 2013, 4:10 am

Soz but not gonna download LoL ever again :P.

Just google a bit, there's so much information out there..
