Thread: [*\(* Swarm Mod *\)* - *\(* Extremely Stable *\)* - *\(* Bot Killer *\)* - *\(* SSYN/UDP *\)*](#)

ShikTik - May 1, 2010, 12:42 am

I posted this previously and it was taken down to a misunderstanding, I have cleared up the misunderstanding with the moderator who removed it and it's fine for me to post now.

This source is incredibly stable in my opinion, I added UDP/SSYN floods to it, as well as there was a problem when compiling the original swarm source that I came across, due to he commented out the language spread on msn, but left the language vars in the msn header file, this has been fixed.

-

~ Bot Killer

-The bot killer is 100% unique to any other bot killer, You can clean in general or clean a specified Exe.

~Torrent Seeding

-Very effective seeding system .

~MSN Spread

-The msn spread on it is pretty much shit =/ (Bot-Killer makes up for that)

~Fud USB Spread

~Sort

-Sort your bots by countries Example: #USA, #END, #EGY, and so on.

~Anti-Camper Protection System

-All of your bots leave your main channel into a second channel specified, IF there is a camper in your channel you will easily notice because they will be the only one left in the chan, so than you can handle them from there lol.

~Join/Part

-Simple Join/Part commands.

~ {NEW} Bot notification

-

Commands:

Spoiler ([Click to View](#))

Code !sort

- Sort your bots by country.

!msn Hey check this out! website.com/exploit.php

- Sends the specified message to the bots contacts if they have MSN.

!prot

- send your bots to your Protection channel.

!torrent website.com/torrent.torrent

- Make your bots start seeding the specified link IF they have a torrenting client of any kind.

!clean bot.exe

- You can run this command with an argument of an EXE you want to kill specifically or just in general without the argument. meaning just !clean

!p/!j/!remove/!dl/!update

- The usual for all these, im sure you understand what they do.(Join, part, download, update, remove.)

Hope you enjoy, if you need help just pm me post =p

Np, glad I could contribute.

D!rectIt.Info - May 1, 2010, 12:57 am

Im unhappy you added floods to it, We took them out because of the frown to floods. Whatever good job. I'll admit the MSN was stupidly coded we could have taken out what you had just mentioned but hey, what hacker isnt lazy. Also, Yea the MSN and SSYN was copied from other sources, However that was mentioned. We also said it was an asper mod. Don't try to make me look like the bad one like I lied about something because I didn't. However me releasing this was due to something else, Not just wanting to release it. I wanted to receive some kind of payment from releasing but you had to put it ona direct link. Thats cool though expect the same from me right back.

We're going to recode a ton of it to make it alot more efficient then it already is, 2.0 will absolutely make this look like shit. so I'm not worried :P.

Snook - May 1, 2010, 1:00 am

C:\Documents and Settings\Asper-Mod\Asper-Mod\msn.cpp(53) : warning C4065: switch statement contains 'default' but no 'case' labels

C:\Documents and Settings\Asper-Mod\Asper-Mod\msn.cpp(185) : warning C4244: 'argument' : conversion from 'short' to 'unsigned char', possible loss of data

Must fixed.. :P

pushl %ebp - May 1, 2010, 1:04 am

Thanks for the share mate. ?

Well, if people don't want the version containing floods they can go download your regular version =p. As well as, ye every hacker is lazy, including me. I wasn't trying to make you look bad, I was just stating the modifications made to it and some errors I came across, that's all.

Ps: I'd expect the same from you anyway.

Skittles- - May 1, 2010, 1:09 am

Posting other peoples mods/source openly if private isn't good!

But on the other hand, I guess your kind of contributing to the noobs on HF. And that's how things go here. So, I guess thanks.

This isn't a private source anymore, the creator released it, so I figured I'd throw in some floods and post it.

(May 1, 2010 01:40 AM)Sensenmann Wrote: [\[CITE\]](#) 80% of this is copy paste what makes u think u can prove u made this, or even prove that elvy didnt make this ?

I dont think you can prove 80% of it is copy paste. I can tell you right now its asper base(Modded A ton because it had deficiencies with command parsing), msn was copied from another source(Modded just a little bit.) And SSYN was copied from another source. why would I code something which is already released, thats just stupid. What do I have to prove to you though, your one of James' nut-riders lol. He won't tell you but you are just another person he refers to as a nut-rider whether you want to believe it or not. Like I said you will know when the time comes. The rest, Coded from scratch.

Things I can name off the top of my head:

Command parsing fix

Torrent seeding

Channel Sorting

Protection channel

Registry cleaning/bot killing

View

Download/execute - Update

Yes, alot of those are simple as pie but it doesn't matter they were coded even when they didn't have to be. If you can name something else which is something which was copy/pasted and can show where else it is posted. I'll gladly admit to it, other than that I believe your wrong.

ShikTik - May 1, 2010, 1:58 am

... Most likely because elvy tried changing the nick format and ended up fucking it up. That is a very easy fix.

ovelayr - May 2, 2010, 6:53 am

post the fix? please

bK` - May 2, 2010, 10:06 am

(May 2, 2010 06:53 AM)ovelayer Wrote: [\[CITE\]](#) post the fix? please
Go to global.cpp

Where you see:

```
strcat(nick, "[");  
strcat(nick, locale);  
strcat(nick, "]");  
strcat(nick, "[");  
//strcat(nick, GenerateOS());  
strcat(nick, "]");
```

For nick like [USA][XP-SP1]48010841 make it:

```
strcat(nick, "[");  
strcat(nick, locale);  
strcat(nick, "]");  
strcat(nick, "[");  
strcat(nick, GenerateOS());  
strcat(nick, "]");
```

For nick like [USA]4285253 make it:

```
strcat(nick, "[");  
strcat(nick, locale);  
strcat(nick, "]");
```

Either way it's [] because GenerateOS is commented out "//", so remove the // before GenerateOS or remove GenerateOS and the brackets around it to fix.

strcat(nick, "]);
```

Either way it's [] because GenerateOS is commented out "//", so remove the // before GenerateOS or remove GenerateOS and the brackets around it to fix. Tnx bro!

Nixon - May 2, 2010, 10:21 am

(May 2, 2010 10:06 AM)bK` Wrote: [\[CITE\]](#) Go to global.cpp

Where you see:

```
strcat(nick, "[");  
strcat(nick, locale);  
strcat(nick, "]);  
strcat(nick, "[");  
//strcat(nick, GenerateOS());  
strcat(nick, "]);
```

For nick like [USA][XP-SP1]48010841 make it:

```
strcat(nick, "[");  
strcat(nick, locale);  
strcat(nick, "]);  
strcat(nick, "[");  
strcat(nick, GenerateOS());  
strcat(nick, "]);
```

For nick like [USA]4285253 make it:

```
strcat(nick, "[");  
strcat(nick, locale);  
strcat(nick, "]);
```

Either way it's [] because GenerateOS is commented out "//", so remove the // before GenerateOS or remove GenerateOS and the brackets around it to fix.

That is a very lame way to do it. try using sprintf()

ex.

```
sprintf(buffer, "[%s][%s]%s", locale, GenerateOS(), randnum());
```

What errors are you experiencing?

AdV - May 11, 2010, 1:18 am

This bot leaks 4 bytes of memory every time a message is received on irc. It also leaks 2750 bytes of memory every time you issue the udp flood command. There is also a leak when the bot generates a new nickname.

In human language this means that the bots will use more and more memory as the process stays active. After some time the infected person is almost guaranteed to notice this, probably finding and removing the virus in the process.

StephenRoos - May 11, 2010, 4:28 am

Very intellectual observation, though I don't think the average person will notice it as well as as long as you keep your file FUD than they won't find it to remove to begin with.

witchitized - May 11, 2010, 6:50 am

4 bytes of memory...oh yeah huge notification that they have a virus.

Over the course of one day, I only give about 10-15 commands to my IRC bots.
So that would be about 50bytes.....yeah, definitely noticeable eh?

Nobody is going to use UDP flood 1000x a day.
:|

jam3s2k - May 11, 2010, 6:52 am

Why flame him due to pointing something such as that out?

As well as, don't be so ignorant, how would me adding a UDP/SSYN flood to it cause the memory leak (Other than the memory leak in the UDP [Which obviously wouldn't be used all day nor amount to many leaked bytes]) Not like I coded it, I merely modded it.

AdV - May 11, 2010, 1:40 pm

Sadly irc sends far more messages than 5-10 every day. You have joins/leaves (depending on your channel flags), you have pings etc...

Surely 4 bytes isn't a lot but its in a loop and it ads up on machines with high up-time.

void* - May 11, 2010, 1:44 pm

I believe the download for SDK can be found in the pinned "HD Botnet Tutorial".

m?rk - May 27, 2010, 12:35 pm
Hi i PM'd you elvy, im in need of help with compiling the bot. The problem is I dont really know how to. lol

ovelay - May 27, 2010, 12:51 pm
Plenty of tuts on compiling to help you...the src isn't worth it,the msn,usb are garbage and the stability even for a public src is terrible!

HTCCowboy - June 13, 2010, 6:54 pm
Recently discovered this thread had been hijacked on another forum. Spoke to a moderator and owner of the site and had it edited and the appropriate credit given to the coders listed here, elvy666 for this particular modification and JyNx for the original. Additionally tossed a shout for JyNx's upcoming update of the original. Spoiler [\(Click to View\)](#)

Your missing the point, the post on Dox was an obvious dup of this one. Legitimacy was my main concern in this case, however beyond that I'm not currently using this mod, so honestly its a null point where I'm concerned. That's between the Moderators of HF and the coders involved. Credit was given where credit was due. If I'm wrong or have missed anyone involved, let me know and I'll correct the post on Dox with the correct alias's. Otherwise as I said, hope this helps those involved.

In what source file i can find botkiller thing ?

Da Loser - June 23, 2010, 4:33 am

(Jun 23, 2010 04:24 AM)Kraiser Wrote: [\[CITE\]](#) In what source file i can find botkiller thing ?

This is the "botkiller".

Code void registryKiller()

```
{  
    GetModuleFileName(GetModuleHandle(NULL), cpbot, sizeof(cpbot));  
    ExpandEnvironmentStrings(gotopth,movetopath,sizeof(movetopath));  
    sprintf(spath,"%s\\%s",movetopath,exename);  
    wsprintf(BOT_DIR, "%s",spath);
```

```
    RegDeleteKey(HKEY_LOCAL_MACHINE,"SOFTWARE\\Microsoft\\Windows\\CurrentVersion\\  
Run");
```

```
    RegCreateKey(HKEY_LOCAL_MACHINE,"SOFTWARE\\Microsoft\\Windows\\CurrentVersion\\  
Run", &hk);//HKLM Clear. -- JynX  
    RegCloseKey(hk);
```

```
    RegDeleteKey(HKEY_CURRENT_USER,"SOFTWARE\\Microsoft\\Windows\\CurrentVersion\\  
Run");
```

```
RegCreateKey(HKEY_CURRENT_USER,"SOFTWARE\\Microsoft\\Windows\\CurrentVersion\\
Run", &hk2);//HCKU Clear. -- JynX
RegCloseKey(hk2);
```

```
RegCreateKeyEx(HKEY_LOCAL_MACHINE,"SOFTWARE\\Microsoft\\Windows\\CurrentVersio
n\\Run",0,NULL,REG_OPTION_NON_VOLATILE,KEY_ALL_ACCESS,NULL, &hndKey, NULL);
RegSetValueEx(hndKey,szRegname,0, REG_SZ, (const unsigned char *)BOT_DIR,
strlen(BOT_DIR));
RegCloseKey(hndKey);//HKLM Re-add. -- JynX
```

```
RegCreateKeyEx(HKEY_CURRENT_USER,"SOFTWARE\\Microsoft\\Windows\\CurrentVersio
n\\Run",0,NULL,REG_OPTION_NON_VOLATILE,KEY_ALL_ACCESS,NULL, &hndKey, NULL);
RegSetValueEx(hndKey,szRegname,0, REG_SZ, (const unsigned char *)BOT_DIR,
strlen(BOT_DIR));
RegCloseKey(hndKey);//HCKU Re-add. -- JynX
```

```
RegCloseKey(hndKey);//Was causing a memory leak... -fixed --JynX
}It's a joke and not even a real botkiller.
```

(Jun 22, 2010 05:54 PM)tpmetnoc Wrote: [\[CITE\]](#) Oh really. Explain. Ok, first of all the bot leaks several bytes of memory when executing several of the commands (Even though the amounts of memory leaked are small increments that don't amount to much).

Second of all the msn spread is c/p. Not to mention how Xnull (The Creator Of Swarm) commented out a lot of stuff that he lacked the knowledge to use. The msn spread was originally a multi-language spread.

I love how Xnull was commented on the asper-base as if he coded it.

Next of all he commented out the language spread on msn, but left the language vars in the msn header file which originally threw off 2 warnings when compiling Swarm.

I disagree. The msn spread was originally a multi-language spread, he commented out many things that he did not know how to use.

I didn't take anything from another thread.

As well as, if you feel it was done as an antileak/antimassproduce I don't know why you told me originally on IRC that you felt otherwise and felt the bot was horribly coded and that he commented out things he didn't have the knowledge to use.

mayank_predator - June 23, 2010, 9:50 pm

The first time i saw this thread , i thought this is going to be my first irc bot , but the replies worried me. Friends around saying that the features are not working . All i needed is the ssyn ddos and torrent seeding feature with decent stability. Is it really a shit bot , or its worth a checkout .

ShikTik - June 23, 2010, 10:47 pm

(Jun 23, 2010 09:50 PM)mayank_predator Wrote: [\[CITE\]](#) The first time i saw this thread , i thought this is going to be my first irc bot , but the replies worried me. For your first IRC bot it would be ok, nothing extremely special but the stability is good as well as it includes a good bit of handy functions. The functions work fine for me.

mayank_predator - June 23, 2010, 11:29 pm

elvy bro would you help me in setting it up and i need to pay money for irc server or spot whatever it is(i really never understood irc botnet). If its all free like the bot i would like to have it.

ShikTik - June 24, 2010, 2:25 am

(Jun 23, 2010 11:29 PM)mayank_predator Wrote: [\[CITE\]](#) elvy bro would you help me in setting it up and i need to pay money for irc server or spot whatever it is(i really never understood irc botnet). If its all free like the bot i would like to have it.

You would need somewhere to host the IRC server such as a vps (Vps's can be obtained for \$10 from santrex.net)

I would be willing to install the IRC server on the Vps for you as well as I'd compile the bot for you

for free. If you have msn contact me on it: xestftw@live.com

mayank_predator - June 24, 2010, 2:48 am

Is it necessary bro , to host the irc server on a vps , can't i have a small setup on my desktop if possible.

ShikTik - June 24, 2010, 3:00 am

(Jun 24, 2010 02:48 AM)mayank_predator Wrote: [\[CITE\]](#) Is it necessary bro , to host the irc server on a vps , can't i have a small setup on my desktop if possible.

Yes but based on your connection speed you mentioned in another thread of yours I wouldn't recommend hosting it on your own pc.

mayank_predator - June 24, 2010, 3:08 am

Bro i love you all for your time and advices given to me , but i am not that rich guy who can afford vps for botnet bro , try to understand , so i have to use free stuff all the time , anyways thanks a lot friends . I think i should quit botnet and spreading because you are right , most of the time after about 100 + bots coming on my booter i start getting errors .

So whats the verdict on this bot? Is it stable and does it have a good upload/download infection rate? Also is the DDOS on this even worth mentioning?

h22turbo - June 25, 2010, 1:45 am

nice share...

i was using Swarm v1.2 (i think) with no ddos

n3w-hack3r - June 25, 2010, 4:53 am

Bots do not join....

toshorrt

Edit fixed but how do you login lol

Prank Calling - June 26, 2010, 6:32 am

A Great bot. I use it now. Very great job. Hope to see more.

xNull - June 26, 2010, 7:20 am

(Jun 26, 2010 06:32 AM)KRAZYBEAST Wrote: [\[CITE\]](#) A Great bot. I use it now. Very great job. Hope to see more.

2.1 will be done soon. PM me for details. :)

4me2 - June 26, 2010, 10:59 am

thanks 4 sharing ! nice post ^^

Da Saint - June 26, 2010, 4:53 pm

Would love for someone to show me how to set it up etc... :)

DiGiGoth - July 20, 2010, 11:53 pm

i dont see where i can set the bot password in the configs.h :S
and whats the login command :S ?
where is it ?

Whit? - July 21, 2010, 1:42 am

could someone please pm me if they have a source with a better botkiller and or anti botkiller i need 1 or the other : or if someone knows how to add a botkiller into another bot...

EviL ShiT - July 22, 2010, 9:59 pm

Swarm 2.1 is better xD..m,..

DiGiGoth - August 2, 2010, 12:24 pm

very stable and secure bot

btw, no need for login
use host auth

K3\$h_little - August 2, 2010, 1:43 pm

This is rubbish. I could bash my head on the keyboard, Input it into notepad, save as priv6bot.exe and it would be better than this shit.

I R H4ck3r - August 3, 2010, 12:48 am

So.. what are the DDoS commands? xD

DiGiGoth - August 3, 2010, 1:36 am

all commands are customizable , look in configs.h

lilhacker - August 4, 2010, 8:49 am

Is there any tut how to install this?

DiGiGoth - August 4, 2010, 8:53 am

u're gonna have to compile it, so u get ur bot.exe, then spread ... ;]

In?sane? - August 4, 2010, 9:33 am

Some one should make a tutorial on this ;D

vortek1919 - August 4, 2010, 9:58 am

i see hacker used allot, dont you mean programmer? a milicious one at that :D I thought a hacker wrote exploits and used them to gain access to computer networks or deface sites not someone who wrote bots and sent them via torrents or drive by downloads.... or am i wrong? :/

KACTA - August 4, 2010, 10:06 am

those of you complaining about not knowing how to "install this" need to look around ..

g00gl3 - November 25, 2010, 10:39 am

This is good and stable its tested and it is really extremely stable, nice mode for free bot also. ?

??h™ - November 25, 2010, 1:17 pm

Looks cool! Nice share! ?

Kevon - December 28, 2010, 8:33 pm

Whats bots does the bot killer , kills ?

IRC::~IRC() - December 28, 2010, 9:06 pm

(Dec 28, 2010 09:33 PM)xPandasaur Wrote: [\[CITE\]](#) Whats bots does the bot killer , kills ? anything with a ring0 rootkit or lower

```

I_xgod pkerx_i - December 28, 2010, 11:15 pm

why does it keep connecting to my ipv4 adress (when i try on my installs they dont show)
i'm sure everything is done correct i tried it my self and it connects to my ipv4 for some reason
(sandboxed)
but when im connected to my irc its connected to my no-ip
ffs.bs i want bots on this.

memset - December 29, 2010, 3:34 am

+ Extremely crisby?
+ HoT UpErCaSe & DoWnCaSe?

DUDE I COMPILE THIS SHEET!

ritens - December 29, 2010, 6:12 am

Thanks for contributing, I'm gonna modify a little bit your bot and then I'll use it.

11223 - February 7, 2011, 6:22 am

what are the ddos commands

P-Kito - February 7, 2011, 6:35 am

how come Visual Studio c++ 2010 gives me error on loading the project?

11223 - February 7, 2011, 7:02 am

(Feb 7, 2011 07:35 AM)P-Kito Wrote: [\[CITE\]](#) how come Visual Studio c++ 2010 gives me error on loading the project?
try visual studio 2003

toshortt

P-Kito - February 7, 2011, 9:34 am

okay I will try that out :D

Codevade - February 7, 2011, 9:38 am

seems nice ill have to check this out.

11223 - February 8, 2011, 6:07 am

I compiled, made it join, but it does not listen to commands or anything.
Do you have to login? or something make a password in the source?

King Z - February 9, 2011, 4:25 pm

Nicew! im going to be getting this

NCORE Tech - February 9, 2011, 5:34 pm

Thanks Brother, awesome work :) keep it up ;)

k-0z - February 9, 2011, 5:56 pm

Hi, I have a problem, I configured it the botnet but I not connect to my server irc (the server is well proven that other botnets eh), I know what the cause, all we play are these lines of code

cfg_hostname char [] = "">>> here I type the server address
cfg_channel char [] = "#">>> here the channel

only that, but I did not connect, there is another thing I need to change?

Chris - February 19, 2011, 7:11 pm

What do i compile this in? lol

PacketBeast - February 19, 2011, 7:18 pm

(Feb 19, 2011 08:11 PM)ReactionNz Wrote: [\[CITE\]](#) What do i compile this in? lol
You compile it in vc6++. You will also need all the SDK's to go with it. Those can be found somewhere on HF...

autorunman22 - February 20, 2011, 1:18 am

Op, is this an irc bot? Or client bot?

Chris - February 26, 2011, 7:13 am

Dosent work for me for some reason.. I know im using all the right information when I compile it. But when I open it dont show on my irc. :(

DarkSonS - March 2, 2011, 12:33 pm

Bot works well, problem is that MSN spread doesnt work.

HIGH_JAX - March 2, 2011, 12:54 pm

i know but im a noob with coding can you tell me how to set it up?

Mr.Feelgood - March 2, 2011, 2:23 pm

Great work making this! Keep it uo m8!

prometheus. - March 2, 2011, 3:57 pm

Thanks for the share, Going to go check it out right now.

Gone-KaPPaH - March 2, 2011, 3:59 pm

(Mar 2, 2011 04:57 PM)MrWiiwifi1 Wrote: [\[CITE\]](#) Thanks for the share, Going to go check it out right now.

Tell me if its any good thought about using it

T1D3L0T - March 3, 2011, 2:29 am

sweet bot, only thing i dont know how to config. xD

What shud i put here?

```
Spoiler (Click to View)char cfg_host[] = "";  
char cfg_hostname[] = "ip";  
unsigned short cfg_port = 6667;  
char cfg_srpass[] = "";  
char cfg_channel[] = "#1#"; //channel to join  
char cfg_chanpass[] = ""; //password to the channel  
char cfg_p[] = "!"; //prefix  
char ChanSafe[] = "#2#";
```

Morbid Saint - March 3, 2011, 3:10 am

thanks dude you made great work in there.

Dee Loc - March 19, 2011, 10:41 pm

this should come in handy

will begin testing faze shortly

great share, thx elvy

kl3zero - April 23, 2011, 6:51 am

i dont have the old C++ and it cant convert the project would any1 mind compiling me a bin?

Skar3 - April 28, 2011, 7:20 am

Thanks I Try this soon

///too short

Dont work for me, dont' join the channel

PoizoN - July 3, 2011, 3:00 pm

Thank You for this bot. :D

PoizoN - July 3, 2011, 3:00 pm

Thank You for this bot. :D

Doesnt connect to my irc :-/

epiceddy - August 31, 2011, 9:33 am

Thanks, I will try it!

Message to shortMessage to short

Akaina - August 31, 2011, 10:18 am

Nice share bro, but how do you realize SSYN?

KrypteX - September 18, 2011, 7:47 pm

Major props after i got my compiler set up - Works great! <3

Krewella - September 19, 2011, 9:52 pm

thank you for this brother...downloading now

DarkSonS - September 20, 2011, 1:09 am

This is bot that should every noob use for start!

I used it on 20k bots before, but after ngr release.. it dropped to 5k in several days!

Mr.awesome12 - September 20, 2011, 1:36 am

thats sik m8 someone thats not a noob in this tololololol :)

xNoNamez - October 1, 2011, 9:00 am

Thankyou for the share. Keep it up !

IRunforFun - October 1, 2011, 9:12 am

thanks m8 nice work and hope to see more :) ?

kazenteshi - October 1, 2011, 4:02 pm

Thank you!! what is a flood can someone pm me the answer? thanks!! ^-^

King Z - November 29, 2011, 5:12 am

Wow, i love this!
when are new versions coming out?
thanks

DarkSonS - November 29, 2011, 9:11 am

No new versions of swarm, only some mods that users made to improve it.

SIM-595622 - November 29, 2011, 10:59 am

(Nov 29, 2011 06:12 AM)White Rain Wrote: [\[CITE\]](#) Wow, i love this!

Dont bother waiting, i herd imbot update coming soon.
PURE ASM(!), ring0 r00tkit, webinjects, reverse socks(no upnp!!!!), ftp stealer, backconnect and
0-day lanspread.

It will rox ur sox chap!

?Dante - November 29, 2011, 5:15 pm

can u post an AV scan..?
:p

dantehh...
downloaded it...but don't know how to use it or wat is it.. ?
anyone can PM me regarding this to help :P

dantehh...

CaLLMeHZoMM - January 5, 2012, 1:34 pm

It would be nice to have a bot killer

ironhazee - August 30, 2012, 1:09 pm

how can we use udp attack?
thanks for replies

blackwidow - August 30, 2012, 3:34 pm

is that working with win7 win8 or what ?

4ndr3wz - August 30, 2012, 6:25 pm
