My own autoliker which will increase likes on any of your public post.

There are 30 members currently and I hope you will help in increasing members and hence the likes.

Thank You ?

Vouch for me if you like it.

Tho it doesn't give you 30+ likes. It does work, good job .

Hmm in my opinion i don't trust the "Get Token" part, since there is a facebook Rat that has been released

This looks really, really seedy lol.

This doesn't seem to work.

The permissions that this asks for, are very dangerous.

Do not use, until more people have vouched, this doesn't work for me, and could be a RAT.

Can you tell us more about Facebook Rat?

This is not a rat bro, and it is not that easy to setup facebook rat with some application which is

undetectable. You can remove the app after using the Autoliker.
ThankYou
