En1gma - December 26, 2013, 9:11 pm

I've just purchased this E-book and I'm pretty satisfied. The method contains a game I never would of found before and the method is step by step and helped me get started really simple. A small initial investment was required and the money per hour is around about average, also it's very unsaturated. I reckon this method will constantly make me money for a while, I vouch for this

product.

Does not require a good gaming computer.

Intel Pentium Dual Core or Intel Core 2 Duo / AMD A series or C series or E series ATI Radeon Mobility, Radeon Xseries, nVidia M and Go series would work fine. Anything above is great.

Just a few questions for you, simple yes/no answers will work fine.

- 1) Does this involve GameBattles, UMG, Wager matches, Tournaments (Any of these) ?
- 2) Does it involve YouTube or Livestreaming?
- 3) Will it work on Xbox One?

Hello, I was going to give your ebook a try by purchasing it, but I'm getting this error when I click paypal on the checkout page of the Gold package autobuy link: "The receiver xxxxx@xxxx.com does not accept payments in this Currency". I'm in the US btw.
