Hey HF!

Today made a simple "app" and decided to share with you ;)

I know it's too simple but it's a easy way to get anyone minecraft skin.

Code:

```
Code Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button1.Click
```

```
    Dim dir As String
```

```
    Dim myWebClient As New System.Net.WebClient
```

```
    dir = Application.StartupPath & "\" & TextBox1.Text & ".png"
```

```
    myWebClient.DownloadFile("http://s3.amazonaws.com/MinecraftSkins/" & TextBox1.Text &
".png", dir)
```

```
End Sub
```

[Download \(.exe\)](#)

SHA256: 019c898b76c7ad5515f034a447c722c4844d7eb443fb8aa5d802f40eab489910

File name: Skin Stealer.exe

Detection ratio: 0 / 48

Nice, i'm sure there are a lot of people that would use this.

calvv - December 28, 2013, 10:49 am

Great job, as Gabe said this will come to use!

good share

?

Evident - December 28, 2013, 10:50 am

Nice release. I can see a bunch of people using this, including myself.

Bonfire - December 28, 2013, 12:31 pm

Steny released something like this a while ago.

You can check it out here

<https://hackforums.net/showthread.php?tid=3147941>

Nice release though.

Blue Eyes - December 28, 2013, 12:42 pm

Again this is already the 4th post for a skin stealer
