Thread: [this application has been built with an evalution version of smartassembly](#)

Reviews - December 29, 2013, 3:59 am

coded a program on vb obfuscated with red gate

it runs on my pc but i got a mate to test for me and he gets this error (or something like this)

this application has been built with an evalution version of smartassembly, and therefor cannot be distributed.

why is this.

Only3 - December 29, 2013, 4:05 am

do u understand what is evalution version

Hahar - December 29, 2013, 4:06 am

you have to buy smartassembly to be able to use it

Blink - December 29, 2013, 4:06 am

It's pretty self explanatory isn't it? You are using a trail version.

Just use another obfuscator, [confuser](#) is a good one.

arun9020 - December 29, 2013, 4:06 am

its a trial version bro :) So you cant do that :(

Reviews - December 29, 2013, 4:39 am

what i thought the trial version had full functionality what's the point of the trial than.

it has full functionallity besides the trial notice and some limits.

otherwise whats the point of buying it if the trial already got everything?

Patch the main method of your application protected to avoid that message. It must return True to avoid that message. Of course, do it without deobfuscating it.
