Thread: [\[Release\] Auto Updater \[For use with your software\]](#)

CyberTechnologyInc - December 29, 2013, 10:56 am

This updater was made in VB.Net, if you don't need an updater, then why are you here? ?

Picture:

Spoiler ([Click to View](#))

[Virus Scan](#)

[Download](#)

Type "updater /?" for instructions on how to use it. Enjoy!

Cromieeee - December 29, 2013, 2:13 pm

What does this actually do matey?

It looks strange

·Evolved· - December 29, 2013, 5:25 pm

You should post this in the coding section as this is not a hacking tool.

Rewmus - December 30, 2013, 1:02 am

What is this?.. it looks rather pointless.

CyberTechnologyInc - December 31, 2013, 5:24 pm

Hrm, would a moderator move this to the coding section(VB.Net)

I've said what it does in the title lol

It can work as a basic downloader, but the intended use is to update your files.

So what you would do is this (In the command prompt, or a batch file):

Code updater update <fileToDownload> <whereToPlaceDownloadedFile>

<openDownloadedFileWhenFinished:0/1>

Here's a video to help you all: <http://www.youtube.com/watch?v=HH-UxXMHPXc>

(bare in mind I'm not exactly a talkative person)
