I couldn't really find a graphics showcase area, so I decided to post it here. These are some avatars I made for fun while I was bored. Feel free to use these for yourself if you need an avatar. Also, if you'd like one a specific color, please give me the hex code here. All of these are 120x120. Thanks!

Nice Hex, but it's kinda hard to tell for me that it says HF without me knowing.

The Rate My Graphic section is the equivalent of a showcase area.

I like it, but to improve it I'd suggest making all the backdrops transparent and choosing more vibrant colours.

If anyone wants to use one, I would give them the transparent one, and they can have whatever color they want.

I dislike the bars and the plain black background. Just my opinion.

Thanks for the feedback. Also if anyone wanted to use one I would give them a transparent version.

These avatars look really plain and boring, not trying to offend you. Maybe you should add some brighter colours. And add some sort of lighting effects in the background.

So a text with stroke and satin should be a avatar. nope.avi. Sorry mate but they just don't live up to the standards around here.

Should be? I was just messing around, I'm not asking anyone to use them. Kthx.jpg

Hmm, I don't really like them too much, they just feel a bit, dated.

I believe you can do better!
