Thread: [My new build](#)

Harpua - December 30, 2013, 10:17 pm

Just put everything together today. It's for gaming, editing, etc. as well as anything I may need it for in the near future.

CPU: Intel Core i7 4770k@4.5Ghz

Motherboard: Asus Maximus VI Formula

GPU: EVGA GeForce GTX780 Superclocked w/EVGA ACX Cooler

PSU: Corsair HX850 Watt

HDD: Western Digital Caviar Green 3 TB

SSD: 256GB Samsung 840 PRO

RAM: Corsair Vengeance 16GB (2x8GB) DDR3 1600 MHz

Tower: Corsair 600T Special Edition Graphite Series White

CPU Cooler: CM 212 Hyper 212 EVO. Might get a good noctua or a h100i not really overclocking right now so not that big of a deal.

I could've changed a few things here and there but overall I got what I wanted. It fits my wants and needs more than plenty. Everything went smoothly, no problems at all. Windows 8.1 will take some getting used to though. This is my first thread :D. I haven't slept in like 30 hours time to get some rest.

Dining room was only quiet place where I could build it excuse the stuff everywhere.

Before:

[\[IMG\]http://img835.imageshack.us/img835/2189/7z7j.jpg\[/IMG\]](http://img835.imageshack.us/img835/2189/7z7j.jpg)

After:

[\[IMG\]http://img842.imageshack.us/img842/7608/of91.jpg\[/IMG\]](http://img842.imageshack.us/img842/7608/of91.jpg)

[\[IMG\]http://img812.imageshack.us/img812/3856/7vgy.jpg\[/IMG\]](http://img812.imageshack.us/img812/3856/7vgy.jpg)

[\[IMG\]http://img716.imageshack.us/img716/1412/qflk.jpg\[/IMG\]](http://img716.imageshack.us/img716/1412/qflk.jpg)

Pesky cable on the bottom left was run around the back. EDIT: I flipped over the PSU so now it's fine.

CyberneticTitan - December 30, 2013, 10:34 pm

Congratulations dude! Looks very nice :biggin:

White case high five

SwanSwabber - December 30, 2013, 10:42 pm

Really nice build dude, I wish i could afford that beast!

Buceta - December 30, 2013, 10:45 pm

I love this build. It's almost exactly what I was going to build except I was going to watercool a 4930K and put it in a NZXT Phantom Black.

Tell me how it performs. :D

SwanSwabber - December 30, 2013, 10:56 pm

Shit, you guys are so lucky!
I really wish i had the money for a build like this :l

Buceta - December 30, 2013, 10:59 pm

I work everyday and save so I can have nice things. :/

Mac Miller• - December 30, 2013, 11:05 pm

We have the same motherboard! I dont know anyone else that has it.

Owango - December 30, 2013, 11:08 pm

I have the silver 600T. I absolutely love that case. Nice build.

Royal Blood - December 30, 2013, 11:09 pm

Very nice. I still hate that case though. At least you picked out quality parts.

Metalocalypse - December 30, 2013, 11:33 pm

Why the WD Green? I don't think I could live with it's slowness.

Harpuia - December 30, 2013, 11:41 pm

(Dec 31, 2013 12:33 AM)Metalocalypse Wrote: [\[CITE\]](#) Why the WD Green? I don't think I could live with it's slowness.

It was a good deal for a lot of space, if it's too slow for my liking I'll just pick up a WD Black. For now it's fine, most important stuff on SSD anyways.

.DATLOL - December 30, 2013, 11:50 pm

Should have gotten at least a 500GB/1TB WD Black and a 1TB WD Blue or something like that, what I would have done at least.

clark.dll - December 30, 2013, 11:50 pm

That build though.

Fuck man, that case too. Very sexy.

Harpuia - December 31, 2013, 12:01 am

(Dec 31, 2013 12:54 AM)Rikka Wrote: [\[CITE\]](#) How does the Samsung 840 pro perform? I've heard it's the fastest SSD on the market.

Haven't used it long enough but I've heard great things about it.

Mikavw - December 31, 2013, 12:50 am

Nice build man.

Love the case.

And the WD green isnt that slow.

I have a 1tb one as my main hdd, because the blue's and black's where out of stock and i refused to go seagate.

But i can live with it, i'll probably pick up an ssd soon.

Law - December 31, 2013, 1:24 am

(Dec 31, 2013 12:05 AM)?Mac Miller? Wrote: [\[CITE\]](#) We have the same motherboard! I dont know anyone else that has it.

Are you kidding me?

That board is as popular and over used as much as Lisa Ann on Pornhub.

K?ala - December 31, 2013, 2:32 am

Looks very nice! People will always nit pick. Great build, maybe take the side panel off and show that cable management?

Harpua - January 2, 2014, 2:31 pm

It's been nearly 3 days since I built this and I couldn't be happier. Performs like a monster and runs really quiet. Getting used to Windows 8.1 isn't that bad either.

CyberneticTitan - January 2, 2014, 2:34 pm

If you miss the start button, you can always get StartIsBack or Start8.

(I use SIB)

Harpua - January 2, 2014, 2:41 pm

(I use SIB)I used start8 and got rid of it because start was unresponsive unless I clicked it in a certain place. I'd rather just get used to it completely. I still have windows 7 on my laptop so I won't miss it too much.Thanks for the suggestion :).

r1seN- - January 2, 2014, 3:08 pm

Very sexy Case, I love white! Very nice build too :)

?I???po?N? - January 23, 2014, 11:14 am

Wondering what you got to pay for a build like this?

Harpua - January 24, 2014, 12:49 pm

(Jan 23, 2014 12:14 PM)?I???po?N? Wrote: [\[CITE\]](#) Wondering what you got to pay for a build like this?

I'd prefer not to disclose my methods for obvious reasons and the fact that I make quite a bit of money illegally. ?

Hagzer - January 30, 2014, 3:55 am

awsome, i edit a little bit and i got a price (1400) Same things in it.

5ergey - January 30, 2014, 4:15 am

nice job, looks great :0 i built my pc 7 months ago

YourTommy - February 14, 2014, 3:52 pm

omg dis is da poop :) but dat case :(meh :P

SIM-1179616 - February 14, 2014, 4:10 pm

Loving the heatsink, same one I use in all my builds man. The Cooler Master Hyper 212 is

awesome

Aesthetics - February 14, 2014, 4:18 pm

Why do you have your EPS cables routed in front instead of back.

Dogelan - February 14, 2014, 4:28 pm

(Feb 14, 2014 05:10 PM)Tyrantelf Wrote: [\[CITE\]](#) Loving the heatsink, same one I use in all my builds man. The Cooler Master Hyper 212 is awesome
This. The Hyper 212 is a badass CPU cooler for any modern processor.

SIM-1179616 - February 14, 2014, 4:31 pm

(Feb 14, 2014 05:28 PM)Meh™ Wrote: [\[CITE\]](#) This. The Hyper 212 is a badass CPU cooler for any modern processor.

Yeah, fuck water cooling. Why even mess with water around sensitive components when this beast can do almost as well without the effort or risk.

Aesthetics - February 14, 2014, 4:37 pm

(Feb 14, 2014 05:31 PM)Tyrantelf Wrote: [\[CITE\]](#) Yeah, fuck water cooling. Why even mess with water around sensitive components when this beast can do almost as well without the effort or risk. Lol, only average joe wouldn't benefit from watercooling.

I'm getting 40c on my GPU and 55c on my CPU

@ 4.8Ghz

GPU @ 1200/1500

I don't see hyper 212 EVO doing that. It would probably hit Tj max. Plus You can't mount hyper 212 EVO to your GPU..

Mung - February 14, 2014, 4:42 pm

Nice one op, that 4770K really compliments the rest of the build. ?

T0ucaNSaM - February 14, 2014, 8:05 pm

Dude nice build very sleep and fresh i like the white with red casing

Metalocalypse - February 14, 2014, 11:25 pm

(Feb 14, 2014 05:31 PM)Tyrantelf Wrote: [\[CITE\]](#) Yeah, fuck water cooling. Why even mess with water around sensitive components when this beast can do almost as well without the effort or risk. Probably basing an opinion off skid watercoolers.

JackChitt - February 15, 2014, 12:36 am

Hey!! Nice rig. I had that same CoolerMaster heat sink before I went liquid!

[\[IMG\]http://imgizer.imageshack.us/v2/640x480q90/59/kke2.jpg](http://imgizer.imageshack.us/v2/640x480q90/59/kke2.jpg)[\[/IMG\]](#)

(Feb 14, 2014 05:31 PM)Tyrantelf Wrote: [\[CITE\]](#) Yeah, fuck water cooling. Why even mess with water around sensitive components when this beast can do almost as well without the effort or risk. Because the it's quiet, cools better and the liquid I use is non-conductive.

Aesthetics - February 15, 2014, 1:01 am

(Feb 15, 2014 01:36 AM)JackChitt Wrote: [\[CITE\]](#) Hey!! Nice rig. I had that same CoolerMaster heat sink before I went liquid!

Because the it's quiet, cools better and the liquid I use is non-conductive.
Any liquid can be conductive, even the ones that claim themselves to be non-conductive.

JackChitt - February 15, 2014, 2:59 am

(Feb 15, 2014 02:01 AM)Aesthetics Wrote: [\[CITE\]](#) Any liquid can be conductive, even the ones that claim themselves to be non-conductive.

Only if contaminated. Either way.. My seals are tight and so are my clamps. No worries here bro.

Aesthetics - February 15, 2014, 3:10 am

(Feb 15, 2014 03:59 AM)JackChitt Wrote: [\[CITE\]](#) Only if contaminated. Either way.. My seals are tight and so are my clamps. No worries here bro.

No, any liquid used in your loop will pick up traces of metal particles and ions that escapes from radiators, pumps, cpu blocks. This cause liquid and even so called "non conductive" to gradually become conductive.

Either way, if you installed your loop correctly, shouldn't have to worry about it.

Bo Burnham. - February 15, 2014, 4:34 am

Sick build OP. Would want some pictures on your gaming-corner! Running this build on 1x monitor would be quite a waste imo.

JackChitt - February 15, 2014, 5:03 am

(Feb 15, 2014 04:10 AM)Aesthetics Wrote: [\[CITE\]](#) No, any liquid used in your loop will pick up traces of metal particles and ions that escapes from radiators, pumps, cpu blocks. This cause liquid and even so called "non conductive" to gradually become conductive.

Either way, if you installed your loop correctly, shouldn't have to worry about it.

I am using a deionized solution and change it every 2 years. I assure you my loop is tightly fit with clamps at each connection. I have never had a drop escape my rig in the 3 years it's been running.

Mix HD - February 15, 2014, 2:35 pm

Damn, thats sexy pc there. The case is really nice.

Lady Deathstroke - February 15, 2014, 2:37 pm

This looks like an awesome build and it seems like for what you need it will serve you perfectly the only thing I would have perhaps done differently is gone for some 1866 memory but that's just because I've heard great things about it.

Overall looks like a great PC that seems to have been built well should serve your needs perfectly.

Xuna - February 18, 2014, 10:55 am

Why havent you bought a water cooler instead, when buying them good parts and not a water cooler, they are just 100% nicer than these big things...

Sysmatic - February 18, 2014, 1:49 pm

I like the cable management, I love the case.

It's a nice PC you got yourself OP.

skaterebw - February 18, 2014, 3:10 pm

Vary nice build all the parts you picked are great. :) gotta love dem white cases.

M1m1 - February 18, 2014, 9:46 pm

Nice build, I love the case, might buy one soon.

Inverse - February 18, 2014, 10:44 pm

Cable management. Its satisfying when someone does it right, it does wonders for temperatures using air cooling.

Nice build1
