iTap - May 1, 2010, 3:21 pm

Hello everyone, this is an extremely basic, but FUD crypter and it is COMPLETELY free.

I realize that I have 0 rep, and a relatively low post count so I encourage you to run it sandboxed or in a virtual box

Does this require .net? If not, can I get the normal download link?

Sin - May 1, 2010, 4:51 pm

Ran it in sandboxie, clean. Nice crypter. Transparency kinda looks weird though. None the less still a great crypter. Stubs FUD too.

Thanks for multiupload link , it crypts fine, And its FUD i think.
But i also think it corrupts my file. Im using DarkComet RAT and my server uses RES.

I crypted an exe file but i wonder, the crypted file is just a file, white. so i wonder does people get infected when clicking the white file?

Save it as filename.exe as the name. Try doing that and see if it changes.
