Even though you bought a licensed resell right doesn't give you the right to call them YOUR templates. There's a guy out there that has put a lot of effort in these templates ;)

Looking great, interested in buying possibly

Does it have an admin panel?

Ok um no it does not have an admin panel, you can edit it using dreamweaver which works well with editing theses templates! you could try installing a wordpress cms on your server then uploading this, which COULD work but not 100% sure. Allways working with dreamweaver!!
