Thread: [\[STOCKS\] Anyone invest in any WEED stocks?](#)

Xysts - January 2, 2014, 10:45 am

Just wondering if anyone got in on any weed stocks this week.
Many of these stocks are very low at the moment.
Do you guys feel that its a good area to get into?

Above is a list of the current companies that are available in the field of weed.

I personally saw a 114% gain today in the stock #PHOT
Anyone else have any luck today! Cheers

Most of them are penny stocks...

go big or go home ;)

Wanted to buy PHOT around august/july, decided not too though, missed out on a lot of money.

I've found four publicly traded companies that deal with marijuana. I really don't like OTC stock, but I do have a strong belief that marijuana is going to become a very large industry like tobacco.

I believe this too. I think they are setting up plans behind closed doors.

Very nice, That's what I am thinking as well. Once everything in Denver goes well more and more states will follow suit and will be a booming industry I think.

Great link, I was pretty shocked that day one they made 1 mill. It is just going to continue to rise once they get the supply end figured out. Thanks for sharing.

I would like to issue a warning to members investing in the companies that sell or distribute marijuana, whether it's medicinal or recreational, you can still be pulled up on federal charges for aiding and abetting in the sale and/or distribution of a Schedule I narcotic.

The likelihood of this occurring though is most likely approaching zero.

Most brokers will allow you to trade penny stocks. You may be able to find a broker that specifically caters to penny stock traders, but I would certainly look into their legitimacy very carefully.
