[InfiniteCloud](#)

Please come check out a file sharing website my friend and I made. Just beware, still working on some css for it so it is kinda barebones right now, but just tell me how the structure looks??(link in title)

Meeco - January 5, 2014, 5:57 pm

I think its pretty neat, I had to register a crap acct to check it out, but the only thing I am not crazy about is after you log in it takes you to your files, etc.. the box just seems way to big with extremely minimal options lol.. other then that, its very simple / neat.

I just joined the site.

- 1)I think the "Log Out" should be a button rather than plain text.
- 2)Possibly move the dashboard footer up a bit. (Its cut off at least on my monitor)
- 3)The dashboard is pretty dull right now, and could be prettier looking.
- 4)Maybe make the 25GB a little lower like 15GB-20GB, and add a referral type program to get more space. (500MB per ref or 1 GB per ref and likely set a cap to the storage space.)
- 5)Maybe add an ad or 2 to generate some income, and add some ways for users to be able to hide them. (E.g. Pay to remove them, refer a friend to remove them, advertise to remove them, etc.)
- 6)Add an optional landing page for download links. (A customizable one would be great)
- 7)Add a icon for the type of file in the dashboard.
- 8)Should also add a way to report files.

I see potential for the site, especially considering its new, and I hope some of my ideas are useful. I'll likely end up using your site, and I wish you the best of luck with it, and i'll see if any of my friends want to use it.

Edit: I just noticed the 0B/25 GB doesn't seem to change is that a bug or does it take a while to update it?

Thanks for the feedback bigbadke12!

It is rather dull at the moment, and thank you for reporting the bug to me. All of those ideas are brilliant too, and I will talk to my my partner about them. Please, tell all of your friends, the more users, the better the website will be.

Hello Stanley. Here is my criticism:

The login and register buttons do not fit into the theme. Maybe a less pixely font?

The terms of service should not move left and right after showing and hiding.

It should also automatically update after selecting a file.

There needs to be a comma between "So far" and "you have"

Oh, you're zack, I was hoping you we're Stanley, I would discuss at length why exactly he removed me.

I???I??? - January 7, 2014, 7:34 pm

Seems pretty decent so far. I would add a home page soon

Knar. - January 7, 2014, 8:29 pm

Login and Register page are too small

Don't add a beta button if there is no beta

Do something about the blank space (which is everywhere)

Get a better font, the one you have looks horrid

Why is the Log Out button the first thing you're greeted with (float it to the right or something)

Redo the design, it's very bland and boring

Use AJAX to upload files, took way to long to upload.

Adjust the table size to fit the amount of files.

WOLGA - *January 7, 2014, 9:56 pm*

In the beginning, if you're not actually loading anything, than that cloud is useless.

SIM-2124254 - *January 9, 2014, 4:18 pm*

So I just noticed something I should've noticed before, there's no "forgot password" option which is a pretty necessary thing for some people.
