Thread: [Jailbreak/Unlocking Your iPod Touch or iPhone \(Extremely Trusted\)](#)

Nick™ - May 1, 2010, 10:43 pm

Welcome To My Service Thread.

I will be offering my service of jailbreaking or unlocking your iPod Touch or iPhone. I will be having a one on one session with you explaining the jailbreak and doing the process via team viewer. Not only will jail break for you, I will set you up with some good jailbroken applications, (like the ones that let you get free app store apps) and give you a few good sites. All jailbreaks and unlocks will cost only \$5.

I will jailbreak any firmware up to 3.1.2.

Also, I would like to point out that I am not just some average joe jailbreaking your device. I am extremely experienced with these types of things. I am currently a moderator at one of the largest iPod/iPhone community's (can confirm if needed :)). So I know what I am doing, and I am very trusted if they gave me the position of mod.

Disclaimer

All the software that is used is free. There are many many tutorials online that show how to jailbreak a device. What you are paying for is for me to do the process for you, and also set you fully up 100% after you have jailbroken. I will answer all your questions and sit down with you for as long as you need. I am in no way responsible for any actions that may happen to your device. While the chances of anything happening is very low, there is always a chance. When you place an order, you automatically agree to this.

Nick™ - May 2, 2010, 3:24 pm

Bump Bump.

I'm online right now for a little while :)

PM me, we can talk about your device even if your already jailbroken. Maybe I can show you some secrets.

Fellaini - May 2, 2010, 4:08 pm

can you jailbreak a itouch 2g mc model so i can turn it off and on when it is jailbreaken because when i do it, when you turn it off you have to plug it back in your computer and jailbreak it again
