No offense, but what's the point of defacing a website?

If everyone would deface a webpage and post it here, the forum servers would die.

What you could do is try and replace `http://` with `view-source:` assuming you're on Chrome.

Oh thanks I have seen this before but I have never used it. You learn something new everyday.

I love how everyone took Deeup's sarcasm seriously ;d.

AlphaDelta - January 4, 2014, 4:06 pm

That is possibly the most cliché deface page ever.
