Thread: [\[TuT\] How to test if your DarkComet is working without test slaves! \[No Anubis\]](#)

3nterman234 - January 4, 2014, 2:13 pm

How to test your DarkComet

Note: Take off any password on your DarkComet Client.

- This will be a tutorial on how to test if your DarkComet is fully set up correctly, without needing a few test installs! -

What you'll need:

<http://3nterman234.us.to:25567/testdarkcomet.html>

<http://whatsmyip.org/>

[Optional: NoIP](#)

First, go to WhatsMyIp, and copy this number at the top:

Second, go to my website:

Now enter the number you've copied from WhatsMyIP into the 'IP:' field.

Then enter the port that your DarkComet client is listening to in the 'Port:' field.

and click 'Send'.

It's as simple as that!

Now you'll be sent 1-3 "fake slaves", and if they send correctly, your DarkComet is set up and working. If not, it should display 'Failed.' on the site.

An 'Anubis-like' testing center may be added to the site later, where you can upload your crypted files without having to worry about distribution. It'll upload it to a test machine, run it, and then reset.

If you have any questions - or want to report a problem, please contact me on Skype:

[live:enterx_3](skype:live:enterx_3)

I am open most of the time to help you set up your DarkComet!

Especially whenever I get the Anubis thing done ?

Thanks for the quick reply :)

kylekillzone - January 4, 2014, 2:57 pm

thanks! cool website for testing DC. Perfect for what i needed

3nterman234 - January 4, 2014, 3:29 pm

(Jan 4, 2014 03:57 PM)kylekillzone Wrote: [\[CITE\]](#) thanks! cool website for testing DC. Perfect for what i needed

Thanks for the responses

Sorry for the downtime everyone, the server is acting glitchy when certain connections are made. I'm trying to investigate it now.

Rick Sanchez. - January 4, 2014, 4:03 pm

good way to test if your DC server is working.

That guy helped me set up my RAT , thank you very much!

overdead - January 4, 2014, 4:53 pm

This is a great share, thanks so much for posting this and putting the effort in. Maybe, just maybe, I will see the RAT section lacking half of the posts regarding 'help test slave'.

3nterman234 - January 4, 2014, 5:44 pm

(Jan 4, 2014 05:53 PM)overdead Wrote: [\[CITE\]](#) This is a great share, thanks so much for posting this and putting the effort in. Maybe, just maybe, I will see the RAT section lacking half of the posts regarding 'help test slave'.

Thats mostly the reason I coded this, to stop 'test slaves' from being 99% of the posts here.

Remember everyone, if it says 'Failed.', feel free to message me on Skype:

BladeFL - January 4, 2014, 8:14 pm

Thanks for this it helped solve my problem.

3nterman234 - January 5, 2014, 12:48 pm

I know we've been having troubles with lag, if you do have a problem, please do message me on Skype. Sometimes I'm unaware of the problems and can't fix them if there is no one telling me ?

Thanks everyone for using this, it really means a lot to me ?

cudaica - January 5, 2014, 1:01 pm

This is a very good way of testing out your port is working or not. (; Thanks for sharing

lucz0rr - January 5, 2014, 1:05 pm

thanks works like a charm :) hope you keep it up :D

coolerfarmer - January 5, 2014, 1:11 pm

servers are down!

[img]http://coolerfarmer.de/screen/2014-01-05_22-10-37.png[/img]

3nterman234 - January 5, 2014, 1:25 pm

I'm trying to work on it, I believe I know the problem, it's just how to fix it.

When my server tries to send fake slaves, it holds, making the website believe that the server is down ?

ihatemylife - January 6, 2014, 4:29 pm

This guy helped me soo much very nice guy

melonhead361 - January 6, 2014, 4:57 pm

this deserves to be a sticky since all of teh peeps ask for test installs

Jam2556 - January 6, 2014, 5:48 pm

I just got brought to a page called sendserver.php and an IP address (not mine) was on the screen.

Eddd - January 6, 2014, 9:06 pm

Cool thankyouuuu very much :) helps testing without a second computer

DarK-D3v!L - January 7, 2014, 12:12 am

THIS POST NEED TO BE PINNED !!!

great job bro , it will help a lot of newbies in RATs , thanks for sharing :)
best regards

Ramditto - January 7, 2014, 1:04 am

hmmm.. is this only for usa? cuz i cant access the website :(

3nterman234 - January 7, 2014, 10:49 am

Sorry guys, my internet is down and can't host the site ATM

Apparently I need to fix more bugs, too.

Thanks for the awesome feedback ?

Louis C.K. - January 9, 2014, 1:26 pm

are there any other way to test it? without this service because it takes too long to wait

3nterman234 - January 9, 2014, 1:29 pm

(Jan 9, 2014 02:26 PM)cowmanr Wrote: [\[CITE\]](#) are there any other way to test it? without this service because it takes too long to wait

You mean my current one? The <http://3nterman234.us.to:25567/testdarkcometupload.html> ?

~Nathan~ - January 13, 2014, 1:27 pm

Thanks for this. It is a good way to test your DC rat.

ihatemylife - January 14, 2014, 2:43 pm

Nice I use this everyday plus if you have problems he helps you

kurupt1 - January 19, 2014, 12:48 pm

First of thank you for developing this website. Hope to see you back online soon.

3nterman234 - January 19, 2014, 12:55 pm

Oh, the server I guess restarted due to Windows updates,
I'll have it back on in a little.

Shanks - January 19, 2014, 12:57 pm

That's a great Share ! Will probably help some members

3nterman234 - January 19, 2014, 12:59 pm

It should be back on when I update the 3nterman234.us.to website with new settings.

Be sure to check out the newest one:

gaberoks453 - February 27, 2015, 8:54 am

that rat website though how cool are you

EddietheZombie - February 27, 2015, 4:44 pm

Could've used this when I began using DarkComet, thanks!

wpamp5 - April 17, 2015, 10:23 am

just checking to see if its just me, but it seems like the site is down?:/

Fr?sh - April 17, 2015, 10:24 am

Or you could just run it in VM or Sandboxie

Indus - April 17, 2015, 3:10 pm

YO man ... thnx for sharing and helping the community.

Really appreciate that

3nterman234 - April 17, 2015, 3:23 pm

Holy old gravedig

This has been gone for over a year, so don't expect it to be up... (sorry)

Kify - April 17, 2015, 3:51 pm

This is just perfect, thanks for sharing

RedTokenRing0 - April 17, 2015, 4:24 pm

nice man, this worked for me! just make sure the ports are forwarded in your router configuration settings!!

?Syria - April 17, 2015, 4:43 pm

no body thought that this is weird? its just allows DC? Maby its extracting your passwords? idk

3nterman234 - April 17, 2015, 7:12 pm

(Apr 17, 2015 04:43 PM)?Syriamanal Wrote: [\[CITE\]](#) no body thought that this is weird? its just allows DC? Maby its extracting your passwords? idk

All it did was send a fake darkcomet connection packet to your client to see if your ports were forwarded correctly & your darkcomet was working fine. It hasnt been in service for awhile now ?

ankitkhosya - April 17, 2015, 7:14 pm

hmm , Something new- Imaginary + rep given.

Appreciate it bro.

Adolfy - June 2, 2015, 8:10 am

site is down can you plz fix it :DDD

3nterman234 - June 2, 2015, 2:45 pm

(Jun 2, 2015 08:10 AM)Adolfy Wrote: [\[CITE\]](#) site is down can you plz fix it :DDD

Look at the date, the site went down awhile ago
