Thread: [LSport.nl - Football/Soccer News Website - Imports News Automatically](#)

IIBAN - January 5, 2014, 4:04 am

Hi there fellow HackForum members,

I have been working on a sport news website and was wondering if anyone had any suggestions for me before I launch this website live.

The website currently imports sport (mainly football/soccer) news from different websites and posts them to my website. Of course, the source is mentioned to not get into any legal trouble.

Link to website: <http://lsport.nl/>

Also, I am going to implement a livescore webpage, so that people can see the current games going on, fixtures and whatnot.

Please give me feedback and tell me what more you would like to see added to this website. However, please keep in mind that I want to keep the site clean and easy to use so that the user experience is optimal.

Link to website: <http://lsport.nl/>

Let me know what you think!

Is there anyone who can review this for me before I launch it live? If your suggestions indeed do improve the site, I will be more than happy to reward you!

Rickvdl - January 6, 2014, 9:43 am

Hi man,

Looks good i think.

Please add me on Skype: rickvdl25 i will talk with you there about this :)

Btw also from NL :)

See you there

Thanks, anyone else have some suggestions before I launch the site?

IIBAN - January 9, 2014, 7:50 am

Updated main post! The site is now live! Let me know what you think :)
