Quality: 7/10

This eBook has a lot of quality information. I really like how almost every step has a supporting screenshot which tells you what to do. Everything is really clear and easy to understand. If you have SEO experience and you are very good at it, I would definitely recommend buying this eBook.

Originality: 2/10

This isn't an eBook that you find on the internet. But everything in it is publicly known.

Ease of use: 6/10

As I have not received a vital part of the eBook I can not say this for sure, but you will have a lot of competition and you need to have a unique idea in order to do this successfully. The initial start-up will cost you money and it will take you time. You may need a few days to set everything up. Take SEO into account as well. When everything is set up and working you will not need a lot of time.

Grammar: Average/Good

As I am not a professional English teacher I can not say this for sure, but there were multiple capitalization mistakes. The grammar does not affect your reading experience in a bad way at all.

Layout: 8/10

I don't come across eBooks with a nice layout often, but this eBook makes it really easy to read through it. It is very easy to understand everything.

Overall: 5.5/10

As I have not received some things which I hope customers will get (getting traffic), it will be really difficult to earn your money back, having multiple monthly subscriptions are really going to add up as well. If you are one of the lucky people to make it to Google's #1 spot with good keywords you will make bank with this method.

Please do note: This method is white-hat.

With that said, GLWS!

Frequently Asked Questions:

Does it matter what country I'm from?

No. You will only need an internet connection.

What are the start-up costs?

Besides this course, a domain name, web hosting & email marketing platform. I provide you with a resource inside the course for getting your first month of web hosting for a penny & an email marketing platform for \$1

What are the ongoing costs?

Just the web hosting & email marketing platform. After getting your first month of web hosting for a penny, web hosting is \$8-\$9 per month & email marketing platform for \$19. If you already have web hosting, you will not have any additional costs to run this method.

Do I need technical skills?

No. I myself have no technical skills, so if I can do this, you can too. I included a high-converting page with this package. This method is specifically designed for people who have no technical know-how.

How quickly can I begin making money?

The set-up steps take around 1-2 hours to complete. From here, it's up to you, depending upon how much effort you put into this.

Do I have to pay for advertising?

No. I share a method that allows you to do this without paying for advertising or investing anything into getting leads.

How much time do I need to spend on the business?

It's up to you. As mentioned, this method can be run on a full-time or a part-time basis. At a minimum, though, if you're doing the work yourself, I'd say that you should invest at least 1-2 hours per day into this method.

DON'T BE SHY TO ASK QUESTION, EITHER BY PM OR REPLY.

(Jan 7, 2014 09:41 AM)SexyJutsu Wrote: [CITE](#) this looks amazing but why market a method thats making you so much money? Unless its slowly starting to fade away (the money i mean) which looks like the reason seeing as you using last years images if not older

To be honest, everyone here sells the method for extra revenue. But, I sold it because, It won't affect my earnings, or your earnings.

Also, I didn't start selling this eBook here, but in so many places. I just change names for some security purposes.

Thanks!

(Jan 7, 2014 09:45 AM)Kipcorn Wrote: [\[CITE\]](#) This looks really amazing, does it involve affiliate marketing?

Yes, but you won't be promoting your link. You will be promoting something easier to promote your affiliate link with it. In this case, much revenue could be made.
