Hello HF,

I'm sure this only interests a small portion of people so if this isn't for you don't even post in the thread :)

This is not porn, there is no nudity involved just pov fetish instructions.

I have over 40GB of custom made video clips from hot online fem dommes.

Probably spent near 3000\$ on all of them.

Clips from girls like ceara lynch, princess lyne, bratty jamie, and many more.

Fetish clips like feet, humiliation, cei, joi, forced intoxic and what not.

Selling access to all my clips (40GB or 350 clips) for 20\$ Only!!

To purchase you can do it automatically at: [btcfetish.com](#)

I am only accepting BTC for now.

i still think this is something which is dis approved of by the hack forums rules, i am not sure on this though

i don't think anyone would be interested in buying this in my opinion

Why pay for this when we can get it for free?

I was looking around and didn't find anything about this in the rules. But if it is against the rules that's my fault and it won't happen again.

As for the free comment by koolhunk. You can find clips online but their not HD and they are not of this quality since these are from the top dommes in the scene :)
