Hey I would like a quote, can we discuss on Skype?

Add me: Squashyy97

LaFerrari - January 7, 2014, 11:21 pm

This looks like what I was looking for. Will message you tomorrow or later on.

MaddieCarrot - January 7, 2014, 11:46 pm

Side Note to all potential customers: As said in the post, I will not make you a Crypter. I also will not make you your own custom rat for \$10 and I certainly will not build you a full web-based stresser for \$20.

If you are new to the forums and have no idea what the word program means I suggest you Google it. I will no longer reply to stupid, un-researched requests and if you aren't willing to pay the rock bottom price for a good program then don't ask me to build one for you, I'm not going to bargain with you because you're cheap. ?

Does this service also include online game hacking? If so pm me :) but anyways glws :)

Hi Im Shawn - January 8, 2014, 7:05 am

How much would it cost for a League of Legends OG Name checker?

The bot would Check the name to see if its available then create an account + bypass the capcha?

I would have to look into it further but it sounds quite doable ?

Please send me a PM with more info.

I would like a Vb Program that tracks tweets and every new tweet from lets say "nike" It sends to me as text or email instantly

Another program
a GUID for security on programs

Another program make my Google extensions into a VB bot? I have the full scripts

Another program
a phisher sends stuff to my email

tell me which ones possible thanks!

the app simply uses Oauth to get access to twitter accounts and then the hashtag, text and other stuff is entered by the user.

the app searches for those tweets and favs them.

another app i want is that

i input as many twitter profile links i want and the bot follows and unfollows them "x" number of times given by the user.

oh, one more thing.

My friend needs this, and im getting a comission for getting it done, please PM me with a price
