Firstly the introduction is probably the best I have ever seen for an eBook and it is very rare to see such an insightful introduction on how to setup the method.

Secondly the method is neatly planned out in steps which makes the book easier to follow and keeps the reader interested!

Lastly, The eBook stands out as it contains a highly detailed FAQ plus it contains helpful screenshots to guide the buyer on succeeding with the method.

Once you setup this method I have no doubt in my mind the vast amount of revenue this method will bring in. I would highly suggest buying this product if you wish to make some easy bucks!

Big vouch for the method and Huskers. GLWS mate.

Honestly, there is no set amount or anything. It's really just, how much time you want to put into it. You could get lucky and get \$500 the first day or you could get \$500 the first week, or the first month. There's no set amount, but to get those profits, you just have to put some time into it, and the money will come.

Shipping is going pretty cheap. At most you'll need to ship something probably 2 - 3 times a week, if that. If you have to ship more than that, you won't be complaining anyways as you'll be rolling in the dough.

1 more question about the shipping. Will it be small things or big things? I don't want to have to sign for it, and I don't want to have to ship like a plasma TV.

So it will not work :)

This E-Book was so easy to follow. Literally gives you step by step instructions on what to do. Any questions I had were answered by the pictures in the E-book. Some E-books are so vague that you constantly have questions. This is not one of those. It answers every question before you ask it. Could not be written any better. Haven't made money from it yet, but I am hoping to tomorrow and I have no doubt it will work.

Well, you can make anywhere from \$50 - \$400 your first sale, and might take, for your first time, a couple days to a week. But you can have multiple listings at a time which ups the rate of sales.
