Oke I can tell you a view things about this.

First of all, only rat 07 members because that doesn't have JAG EOC does and it is fucking hard to bypass.

Not impossible but hard.

Second thing is, you need to come up with a really new and unsaturated method of getting the people infected.

Alot of people already know jdb, phishing sites, fake .exe's etc.

All I can really say is GoodLuck mate, post your results !

(Jan 7, 2014 10:15 AM)Barcodes Wrote: [\[CITE\]](#) Alright so, I have RATED before but a long time ago, and I need to start a fresh.

I have recently been interested in hacking RS accounts because RSGP sells pretty well if you ask me.

I noticed there are no tutorials on this subject so I kinda need someone to help me out with experience of RAtIng Runescape/games like runescape accounts.

I also don't have a crypter so I'd love if someone could crypt my stub if I decide to start up again.

Thanks!?

PM me your skype, we can talk on there
