Thread: [Ep1c - A teaser from Omni, or an unwanted leak ?](#)

SIM-1456245 - January 7, 2014, 9:43 pm

I was gonna open the custom groups page from the extras page when I saw that Omni added a cool little table that shows what I can access, and I was looking at the table, and bum, I see Ep1c there after ub3r. I was like WTF, is there a new upgrade. I started looking in [Help Docs](#), with no luck. So is this a leak from a surprise that Omni is planning or what ?

Here is a "proof" and go check your self that I'm not "inspect elementing" (a new word, uhu) it...

Or wait, am I missing out a lot, so I don't know about this update or what ?

This was added a while ago, and Ep1c is what Pow3r was turned into. It will be released eventually.

This was added a long time ago now, it'll come when Omniscient's finalized it all.
