Thread: [\[HELP\] Need a community Forum & Servers HACKED!](#)

HackProV6.9 - *January 8, 2014, 5:22 am*

Hello everyone,

I was wondering if a gaming community forum could be hacked for me as well as their servers. They've been major ass holes and have even DDoS attacked me so I want to get back at them. If anyone can help me with this or knows anyone who could do this for me please do not hesitate to comment below. Rewards & Money can and will be negotiated.

Cheers, HackProV6.9 (Don't let my noob name fool you :P).
