How to use

1. Install Imacros for firefox
2. Register on freebitco and do the first free roll.
3. Copy the macro code to "bet" Paste into macro editor, and set the loop amount, and click play loop.

Set the payout multiplier to 100x for the best results.

I think you should test it out if it still works or not (since its old thread) so people won't waste their time. Thank you buddy. ?
