Just because they're ub3r, doesn't mean you should trust them more than a L33T or regular member. With that said, good luck.

Well sir, it is not legal here to ask someone for a paid product!

Please buy it directly from the owner.

Good luck

PS: Don't trust every ub3r/l33t

Try using this:

<https://hackforums.net/showthread.php?tid=2876303>

It works really great and it has most of the features paid keyloggers have.

Also, normal members and l33t might be able to help but post like that make them don't want to help.

Ill have a look on where to download it once I get home.

Before everyone is going to flame, its hwid locked by netseal.

So if he actuall bought it he can just login, if not he can't ;).
