Oh am i. yours do not connect to the actual gta online info of my chars ans friends.

as far as i can tell nobody can actualt exploit online offical gta online info like before now its all blank server and char info so there is no real use of it.

Its successfully patched.

What ive assumed is valid and you need to stop trying to be right. as i stated earlier the dns ive tested after patch have all been unuseful period. its patched in multiple ways.

**Skriluh** - January 10, 2014, 5:40 pm

I love contests! I'm in.

And I do believe there's still a method of doing it. But seeing as how everyone else isn't coming out and saying what the method is then I won't either.

**Iwasted47** - January 10, 2014, 5:41 pm

**Dragon.** - January 10, 2014, 6:12 pm

Its IP authed. Which means if someone gets the dns address, they cannot connect because its only

assigned to certain ip addresses.

Coming on here and saying stuff without knowing. Most of the ones were paid. TU10 Released on the 11'th patched it all for good.
