user name; mfr

Pass: mfrse98

<http://www.mfr-stegreve.org/admin/>

If you type in the wrong password, a window pops up. look to the left- it shows the password?

NukeTripper - January 10, 2014, 2:10 pm

Ups changed some stuff on the website :P

=P

M0bi13s not so private shell

```
$greeting = "Independent Hackers";
```

```
$user = "m0bil3";
```

```
$pass = "letmein";
```

Also instead of value="username" you could use placeholder="username"

Sedulous - January 10, 2014, 3:41 pm

I LOL'd @ the homepage.

Good job, even though it was an extremely easy hack.
