Thread: [Any tagged bot?](#)

The Surgeon - January 11, 2014, 4:43 am

Hey there I tried searching for a tagged bot which automates message sending but couldn't find one. If you know where I could find/buy one hmu!

Explain "tagged bot"? I don't exactly understand what you're wanting it to do.

I doubt you'll find one that specific unless you're willing to pay someone else money to program it for you. If you want to learn how to code it on your own I would be more than happy to refer you to everything you would need to create it.

I was a little bit familiar with webrequests but it looks like I forgot like 80% of coding lol. Waiting for your reply :) !

Well just like I was helping someone earlier:

(Jan 11, 2014 01:46 AM)Tedd Wrote: [\[CITE\]](#) 1. Find out what post data is sent the netflix site to log on, you can do this by either going through the form source code, using wireshark (probably overkill), or the easiest way: view the developer menu on your browser.

EG:

EDIT:

The "authurl" data can be found from the signup.netflix.com page:

2. Learn how to use WebRequest to simulate that post:

<http://msdn.microsoft.com/en-us/library/system.net.webrequest%28v=vs.110%29.aspx>

3. Learn to use CookieContainers to keep the response if it logs in:

<http://msdn.microsoft.com/en-us/library/system.net.cookiecontainer%28v=vs.110%29.aspx>

Same concept except for tagged.com

I made one a while ago for a private client. However, it wasn't cheap lol.
