Fairly simple, maybe too simple?

It's not bad. I don't like how you changed half of the Paypal text to blue. It doesn't fit the theme.

Very sleek design. I like it. Same as above. PayPal is half blue.

Very nice design indeed, I really like the Purple Red mixed with it. I would recommend you to do some more concepts in the background itself. Don't get me wrong here, it's very nice but it need a bit of color in the backing wise. I would defiantly give this a 7/10.

good basic layout simple <3 you should add something there.

^^

This looks clean and modern, the paypal shouldn't be blue tho, doesn't look/feel good to the eye's. 7/10.

Love it. It looks clean simple and the color scheme is good.

The shadow on the prices doesn't look very good.

It's not to simple, I think it's quite good. You should change the glossy style from the pricings though, it doesn't look good when the rest is all flat.

Overall, i like it. But if your going for simple i think you should try to remove the bevel on the prices.
