Thread: [Free file protector .bat \(password\)](#)

osidrusher - January 12, 2014, 10:37 am

i have made a simple batch password protector for anything on your computer....

NOTE

This password from batch is only to keep family, friends, and random users away from that file... Hackers could infiltrate the password if they tried to

Keep things a secret and private.. this batch file keeps whatever u want hidden until you enter the password you had created inside of it

Code cls

@ECHO OFF

title Folder Private

if EXIST "HTG Locker" goto UNLOCK

if NOT EXIST Private goto MDLOCKER

:CONFIRM

echo Are you sure you want to lock the folder(Y/N)

set/p "cho=(more than)"

if %cho%==Y goto LOCK

if %cho%==y goto LOCK

if %cho%==n goto END

if %cho%==N goto END

echo Invalid choice.

goto CONFIRM

:LOCK

ren Private "HTG Locker"

attrib +h +s "HTG Locker"

echo Folder locked

goto End

:UNLOCK

echo Enter password to unlock folder

set/p "pass=(more than)"

if NOT %pass%== "ENTER YOUR NEW PASSWORD HERE" goto FAIL

attrib -h -s "HTG Locker"

ren "HTG Locker" Private

echo Folder Unlocked successfully

goto End

:FAIL

echo Invalid password

goto end

:MDLOCKER

md Private

echo Private created successfully

goto End

:End

guys where it says in caps > "ENTER YOUR NEW PASSWORD HERE" that is where you edit and

put the password you want

SIM-1073426 - January 12, 2014, 10:57 am

Made a super exploit. I can unlock it without the password. It's amazing.

Code attrib -h -s "HTG Locker"

Code attrib -h -s "HTG Locker"

i just made this for hiding folders and programs from family, friends, and just other people that wouldnt know how to find out about what your up to. this isnt a pro password from hackers haha

Thomas446 - January 12, 2014, 11:26 am

well good thing you absolutely skidded this from howtogeek.com

<http://www.howtogeek.com/105633/how-to-create-a-password-protected-folder-without-any-extra-software/>

It even says HTG LOCKER in "your code"

HTG stands for

How

To

Geek

(Jan 12, 2014 12:06 PM)osidrusher Wrote: [\[CITE\]](#) i just made this for hiding folders and programs
-snip-

BS ????????

Code attrib -h -s "HTG Locker"

HOLY SHIT DUDE!

I'm pretty sure it's an Oday exploit, you've must sell it for private!
till it get leaked ... when it will you can put it on ExploitDB..

SIM-1073426 - January 12, 2014, 12:03 pm

I've actually been selling it already on a underground hacking forum. I've earned \$50K from it but sales is going slow now so i thought I'd give it out for free. ?

Woha Thanks dude! That would be very helpful for me .. I'm sure I can Hack now the FBI and the NSA because they use the same method to hide their information from us, Thanks!! ???

osidrusher - January 12, 2014, 3:26 pm

wish i had more feed back on this :(

SIM-1073426 - January 12, 2014, 3:49 pm

Wish skids wouldn't copy and paste the same code over and over again. :(

King of Clubs - January 12, 2014, 3:56 pm

Haha. This is so skidded. Please at least give credits and don't act is if was you who coded this.

Grand Mirasou - January 18, 2014, 11:22 pm

Interesting, will easily baffle any normal person trying to get into something

nickchan - January 19, 2014, 6:30 pm

Well I have two ways of getting around this
Right click edit with notepad
Get the password

Use winrar >.<

Jamescanhack - January 22, 2014, 6:03 pm

how do you use it to put passwords on files?

B1234m1234W - January 23, 2014, 6:01 pm

Because this code is the same as where OP copied it from (<http://www.howtogeek.com/105633/how-to-create-a-password-protected-folder-without-any-extra-software/>) character by character, I'm assuming that you didn't have enough knowledge of batch to have the courtesy not to blatantly steal. Therefore, why even ask for any feedback, fool? You're getting enough already and its the negativity that you deserve.
