Thread: [Craigslist keeps ghosting all of my ads on all accounts i make? i'm using PIA](#)

lilphillog - January 13, 2014, 1:57 am

Craigslist keeps ghosting all of my ads on all accounts even my real account got fully ghosted (all of the ads wont show up on none of the accounts, i made sure i switched up the locations on each account i made too) i make i even verify them with different phone numbers(using pinger)? i'm using PIA, does "private internet access" vpn work with making craigslist accounts? How can i properly make a craigslist account and what VPN should i buy to do so ?

Donkey1000 - January 13, 2014, 4:33 am

Did you try making a new account with the vpn and then posting the ad on the new account with the VPN?

Yes i did multiple times, cleared cookies and all switched locations and all.... Does PIA work with craigslist?

lilphillog - January 16, 2014, 6:09 pm

I'm still looking for advice on this guys....

Wallton - January 16, 2014, 11:18 pm

Boy, most of the VPN are bad for CL. I use my true IP every time, this is the secret. Don't forget to clear cookies, use CCleaner !

I understand using CCleaner but using your real IP address wont work if it gets blacklisted from craigslist because of your accounts getting ghosted multiple times...

Are you posting the exact same ad? Lol. They ghost you for a reason, see what that reason is and fix it. Simple as that.

For example:

Use Ccleaner

Put on VPN

Make ad WITH NEW MAIL

??

Profit

LMAO Hell no i'm not using the same ad, I was using different emails for each account, using different locations on my vpn for each account, i was also using a pinger for the call phone verification... I heard that pinger dont work but the call still went through, i'm starting to think pinger is the reason my posts wasnt showing up...

That's the thing, i didn't even know that because calls was still working and it was still saying that i successfully verified it....I just recently heard about it not working, which was after i was using it.
