Not really digging those colors and that font honestly.

Bitcoin???? - January 13, 2014, 10:29 pm

Nothing really great about them to be honest. Looks like you slapped a texture, wrote some words and changed the colors.

No offence.

3nterman234 - January 14, 2014, 3:51 am

Yeah, thanks for the effort put into it, but they don't really look great on me:

Too simple... Everyone can make this.

Don't like it.

Tesla - January 14, 2014, 7:45 pm

All the graphic "gurus" would obviously not like it. Sure it's simple but that's exactly what it's intended to be. This didn't take no special skill either which I don't claim to have used regardless.

To each his own.

Just the look of this looks so professional, well done!
may well change my avatar to this!

Waxy - January 15, 2014, 6:10 am

Doesn't show any signs of the avatar being an element, rather just a white HF with a coloured background.

Shanks - January 15, 2014, 6:13 am

I don't find anything special with them but Oh well..

King of Clubs - January 15, 2014, 6:14 am

Reciprocal - January 18, 2014, 6:54 am

Willy Arts - January 18, 2014, 7:51 am
