Thread: [Love2D \(LUA\) game](#)

DannyZ - January 14, 2014, 2:26 am

I need help !!!

I need Memory match game

<https://i.imgur.com/GVahIE2.jpg>

With 6x6 (36) fields, Timer and Start/Exit buttons...

I watched some tutorials, used Love2d wiki but there are just games with enemies, zombie, and moving images... I couldn't understand enough and I'm short with time (only 36 hours left), I will be thankfull if someone send me or make this for me.

Why are you short on time? Is this for school?

DannyZ - January 14, 2014, 4:50 am

Yes it's for school, we learn other programming languages this was for us, to understand on our own. With holidays, and i had some work i didn't have time for this, past 3,4 days I'm trying to do something but it goes slow, too slow.

Deadline is tomorrow.

I would really love to help you out with this, unfortunately i have exams in a few days. Sorry pal:/

DannyZ - January 14, 2014, 2:08 pm

I have exams also next week, that's another problem :/

Or simple code for Hangman, it will help... :(
