Thread: [Astro Gaming Headsets 50% off](#)

CtheB - January 15, 2014, 6:08 pm

Hello HF CtheB here bringing you another great share / deal.
Microsoft Store currently has select headsets at a nice 50% off discount.

[A30 Wired](#)

[A30 Wireless](#)

[A40 Wireless](#)

Hope you enjoyed this post.

?

SunnyDeeBoy - January 15, 2014, 6:50 pm

Good deal I suppose but I don't have the cash :P Thanks for the share though.

Wheezy Gang - January 15, 2014, 6:53 pm

God damnit why a40 wireless ? Been looking for wired pair.

CtheB - January 15, 2014, 7:02 pm

Never seen such deep discounts on these. The mixamp alone is \$80 and for \$5 you get a A30 headset.

WRX - January 15, 2014, 7:03 pm

Fuck me I want this but I havent made enough dough through YouTube yet

The wired are here for \$130

EDIT: Just realized they are out of stock so I'm stupid.

Gambino - January 15, 2014, 7:29 pm

I have Astro A50s and I consider it a good HQ headset. The A40s should be good as well

CtheB - January 15, 2014, 7:51 pm

Best amp for gaming period. Offers easy setup to multiple consoles and pc even. simply buy the A30's the amp along is 100+ new anywhere. You can have it now for \$85 thats a little above what people buy for a used one! Beware MS store is really terrible on making the simplest things complicated I was just on telephone for 1 hour not counting the half hour on chat trying to buy this (my billing address issue then my account got locked). It was worth it because I got free overnight

shipping.

Autopost - January 15, 2014, 7:53 pm

I'll probably purchase about five or ten just to resell, damn good prices.

Mohatu - January 15, 2014, 8:15 pm

Thanks for the link bud.

Haha I know, I purchase 3 for now, I'll purchase some more later.

CtheB - January 15, 2014, 8:27 pm

I would've def. gotten the A40's had I not bought a pc headset earlier this week kinda pissed but its okay. Autopost are you a rich prince? hhaha.

Nope, I'm not rich, but I make a decent income compared to lots of users.

I also have the A50's :P there said to be not as good as the A40's but i completely disagree, and there wireless. ?

on-silo - January 16, 2014, 12:43 am

Picked up a pair of a30s ive got 2 a40s and if a mixamp goes down 80\$ for one is worth every penny.

itsmemario - January 16, 2014, 1:34 am

Damm even im thinking about buying a few pairs to re-sell haha thanks for link,

CoNz - January 16, 2014, 1:40 am

Thanks for the share OP, would definitely would have had a pair of wired A40's if they was still in stock.

Creepy-is-Trash - January 16, 2014, 12:56 pm

This was the greatest find ever! I just really needed a mixamp since the one I currently have is broken. I bought the a30's w/ the mixamp.

on-silo - January 16, 2014, 1:25 pm

Also my a40s from 2010 are only 5.1 but this mixamp will get them pushing 7.1 so thats a pretty big plus too.

Potahto - January 16, 2014, 7:06 pm

the A30 Wired link doesn't seem to be working. And when I search for it it's full price? Could you please fix the link! Thank you

CtheB - January 16, 2014, 8:13 pm

Try this?

googlethatt - January 16, 2014, 8:27 pm

someone fancy sending me there receipt please :)

Or does anyone have a microsoft receipt template??

CtheB - January 16, 2014, 8:28 pm

The receipt is basically an email, that doesn't even look legit I wouldn't bother honestly lol

Thank you! It works. I don't know why the other one wasn't working.

Huskar - January 16, 2014, 8:34 pm

Nice deal , but still don't have enough cash.

KyleWTF - January 16, 2014, 8:36 pm

Should I get a A30 wired? How are they?

CtheB - January 16, 2014, 8:40 pm

Go with the A30 wired for the amp alone and get either a audiophile headphone or a headset lots of options.

i would just go ahead and get the A40's its a really good deal and not a substantial amount more than the A30's.

It's not in stock anymore, and I'm not interested in paying retail for those.

Oh than yeah, the A30's wired are a steal at \$80.

Logan - January 16, 2014, 9:42 pm

Kinda glad the A40's are out of stock, I want them but don't need them.

CtheB - January 17, 2014, 8:44 pm

To those that just bought it for the freaking Mixamp I HAVE BAD NEWS. It does not come with a Y-ADAPTER it costs ~17+ god damn it.

on-silo - January 17, 2014, 10:01 pm

I already have a y adapter, i thought those came with the headphones not the mixamp any how.

STR™ - January 17, 2014, 10:03 pm

thanks for the great deal you posted mate , will buy it now

Babz - January 18, 2014, 10:31 pm

FUCK ME I needed those A40s. GODAAM

Dose anyone have any other deals on ASTROS in specific?

FrostedBirdz - January 19, 2014, 2:21 am

There are also A38 Bluetooth's for sell right now on Astro's website. Idk if its actually in stock cause I don't have the money but it seems the color black is in stock. Just thought I would let everyone here know, It says its on sell for 50% off, but \$119.99 doesn't seem too bad. I'd look into it a little bit since its apparently a Beta motel (95% of finish product?)

<http://www.astrogaming.com/a38-bluetooth-headset/a38-wireless-headset.html?cgid=a38>

Edit: Seems to be designed for Mobile Devices since its Bluetooth 3.0.

on-silo - January 19, 2014, 10:27 am

they are 50% off 229.99 and nobody would use bluetooth for gaming. I thought about buying a pair for the gym and decided id look like a douche so i didnt.

CtheB - January 19, 2014, 4:05 pm

To anyone living in the USA, that has best buy, my recommendation is to try and price match. There have been some cases with some luck, that they will in fact honor these prices for the A40's good luck! And again the wired A30's do NOT come with an essential cable to use 2 x 3.5mm which are required for use on any headset. Here is one I purchased and its the last one! Hope somebody found it useful see ya.

Does anyone have any other deals on A40s ? Would appreciate this much.
