Thread: [Which program is used to add animated effects in these pics?](#)

Naruto - January 15, 2014, 7:36 pm

The animation looks pretty interesting but i don't think he did it in photoshop or something like that

Bitcoin???? - January 15, 2014, 7:43 pm

I believe it's Photoshop. Photoshop is capable of doing such animations.

Naruto - January 15, 2014, 7:52 pm

I think they're a little too smooth to be from photoshop

And (based on my limited animating with photoshop knowledge) making some of them would take like forever, i don't think he would put more time in animation than making the rest of the signature

goldenarms_ - January 15, 2014, 8:49 pm

If not photoshop it could have been done in after effects aswell

Napcake - January 16, 2014, 3:51 am

SWF editor is capable of some animations in those signatures.

Basicly make a signature and than load it in, add the effects u want, than export as a .GIF

Digital™ - January 16, 2014, 3:57 am

Use photoshop for this. Once learnt its extremely easy.

Thanks but i already know how to animate in photoshop(kind of)

But look at this, how hard doing this in photoshop would be

Ill look into that thanks

Cubemaster5 - *October 30, 2014, 12:14 pm*

Nope, this is 100% after effects,

I can see they are using trap-code particular, and they are even using default particles
